Abstracts

Veridicom International Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Veridicom International Inc. and its competitors. This provides our Clients with a clear understanding of Veridicom International Inc. position in the Industry.

The report contains detailed information about Veridicom International Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Veridicom International Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Veridicom International Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Veridicom International Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Veridicom International Inc. business.

About Veridicom International Inc.

Veridicom International, Inc. engages in the development, manufacture and sale of capacitive fingerprint sensors, computer peripherals and software related to the use of its fingerprint authentication technology.

Products and Services

The Company provides a suite of identity management products, including hardware and software that utilize public key infrastructure (PKI), secure token-based technology, and fingerprint biometrics to authenticate and manage personal identities for various applications and transactions. This platform provides a biometrically authenticated digital signature for financial, travel, and other applications. Veridicom's patented authentication and transaction technology enables real-time authentication of individuals via the Internet, point-of-sale, security kiosk, and mobile devices. The Company's patented authentication and transaction technology enables real-time authentication of individuals through the Internet, point-of-sale, security kiosk, and mobile devices.

The Company's product portfolio includes:

FPS200: This product contains Solid state silicon fingerprint sensor and 256 x 300

array.

VKI: VKI consists of Portable identity device with USB connectivity, on board fingerprint sensor, flash memory, and security software.

VKI A: Provides access to VPAS software suite and on board flash memory. Software and drivers required to be installed on the PC.

VKI V: This requires no drivers or software to install on the PC to lock/unlock the device. Fingerprint matching and storage of biometric performed within the device. The fingerprint sensor on the device can also be used with the VPAS suite of software to enable PC login, file encryption, and secure password storage with Veridicom's Ewallet application.

Middleware

Cavio 3.0 Identity Server: This product is enterprise level authentication server for Windows, Linux platforms.

VAS Hosted Service: This is a Hosted authentication service from the Company's data center.

SDK: SDK's offered for customer customization and OEMs

Applications

Digital Signature: Biometric signature attached to transactions or events. This provides secure signing capabilities.

VPAS (Veridicom Personal Authentication Suite): The Company's personal Authentication Suite. This application is a bundled solution that allows PC or network logon, and secure logon to Web site or web applications.

Markets

The Company's target markets include:

Financial Services: The Company targets financial services firms;

Travel & Transportation: Target customers within this market segment include travel agents, travel reservations, airlines, airports, hotels, and other travel service providers. The Company has an agreement with Uniglobe, which is part of an international travel service provider, to pilot its technology for the purposes of confirming individual client itineraries and to approve the processing of travel service purchases with client customized payment instructions;

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
