Abstracts

Verigy, Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Verigy, Ltd. and its competitors. This provides our Clients with a clear understanding of Verigy, Ltd. position in the [Semiconductor](#) Industry.

The report contains detailed information about Verigy, Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Verigy, Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Verigy, Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Verigy, Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Verigy, Ltd. business.

About Verigy, Ltd.

Verigy Ltd. engages in the design, development, manufacture, and sale of test systems and solutions for the semiconductor industry. As of October 31, 2010, the company installed approximately 2,400 V93000 Series systems and 2600 V5000 Series systems worldwide.

Products and Services

The company offers a scalable platform for each of the general categories of devices being tested: its V93000 Series platform, designed to test System-on-a-Chip (SOC), System-in-a-Package (SIP) and high-speed memory devices; its V6000 Series platform designed to test both flash memory and dynamic random access memory (DRAM) devices, and its V101 platform, designed to test devices, such as 4, 8, and 16-bit micro-controller units (MCUs) and consumer mixed-signal devices.

V93000 Series Platform—SOC, SIP and High-Speed Memory Test

The company's V93000 Series platform tests SOCs, SIPs and high-speed memory devices, which are used in a range of consumer electronics products, including MP3 players, BluRay disc players, digital televisions, television set-top boxes, PCs, gaming consoles and cell phones, and other wireless communication devices.

V6000 Series Platform—Flash, SRAM, DRAM and Mixed Memory Test

The company's V6000 Series platform is designed to test flash memory, SRAM, DRAM, and mixed memory devices contained in a range of electronic products. It can also test multi-chip packages containing single or multiple types of memory, addressing the use of MCPs to serve the memory requirements of consumer electronics devices.

V101—Low Cost Test System

The company's V101 platform is designed to test electronic devices, such as 4, 8, and 16-bit MCUs—that are used in a range of communications, data processing, consumer, industrial, and military/aerospace products. The V101 is based on hardware and software the company acquired through the acquisition of Inovys in year 2008, combined with hardware and other intellectual property from its SOC/SIP product line.

Touchdown Technologies—Advanced Memory Probe Cards

The company owns Touchdown Technologies, which develops, manufactures, and sells advanced, MEMS (micro electro-mechanical switch) based probe cards used in wafer-sort testing of memory devices. Probe cards are used in conjunction with memory testers, and establish the final physical and electrical connection between the tester and the wafer being tested.

Touchdown's family of probe cards addresses the needs of the flash (including both NAND and NOR applications) and DRAM markets. Touchdown's products include Td110 ACCU-TORQ probe cards for testing high pin count, small die NOR wafers; Td160 ACCU-TORQ probe cards for testing full pin count on NAND wafers; Td110 ACCU-TORQ probe cards for testing DRAM applications use a specially designed probe and a proprietary interposer capable of meeting DRAM applications; and Td300 ACCU-TORQ probe cards for DRAM are capable of testing 300mm DRAM wafers in 6 or fewer touchdowns. Touchdown has also developed custom 200 and 300 millimeter (mm) probe cards, which are being evaluated by potential customers.

Test and Application Expertise, Services and Support

The company's worldwide service organization performs various services for its customers, including professional test expertise services and total system support and professional services. Professional services include value-added, proactive services,

such as yield optimization and test program development assistance. On a global basis, it provides expertise across a range of applications to assist its customers in delivering their new products to the market. System support includes ongoing and reactive services, such as repair, calibration and relocation, as well as education and training.

Customers

The company has a customer base, which includes integrated device manufacturers (IDMs), fabless companies, and test subcontractors, also referred to as subcontractors or OSAT (outsourced sub-assembly and test) providers. OSATs include specialty assembly, package and test companies, as well as wafer foundries, and companies that design, and contract with others for the manufacture of integrated circuits (known as fabless design companies). The company's major customer is ASE Group.

Competition

The company's primary competitors include Advantest Corporation, Teradyne, Inc., LTX-Credence Corporation, and Yokogawa Electric Corporation.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
