In the part that describes Vernalis plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Vernalis plc business.

## **About Vernalis plc**

Vernalis plc, a development stage pharmaceutical company, engages in de novo structure and fragment-based drug discovery, and pre-clinical and clinical development primarily in Europe and North America.

The company has seven product candidates in clinical development (two of which are partnered), two programmes in pre-clinical (one with a partner) and other research programmes.

The company's marketed products include Frovatriptan, a 5-HT<sub>1B/1D</sub> receptor agonist, which is approved as an acute oral treatment for migraine headache and its associated symptoms; and Apokyn, an acute intermittent therapy for the treatment of re-emergence of Parkinson's disease symptoms associated with advanced Parkinson's disease.

## **Product Pipeline**

V3381/Indantadol: It is a Phase IIb study small molecule with a dual mechanism for the treatment of neuropathic pain.

V1512/Levodopa methyl ester/carbidopa: It is a Phase II trial product for Parkinson's disease treatment ((moderate/advanced)).

V10153: It is a Phase IIa recombinant human thrombolytic protein for the treatment of acute ischemic stroke.

V2006 (BIIB014): It is an adenosine A2A receptor antagonist in Phase IIa study for the treatment of Parkinson's disease. Biogen Idec has marketing rights for this product.

V85546: It is a Phase I study selective MMP 12 inhibitor for inflammation.

V24343: It is a Phase I study cannabinoid type 1 receptor antagonist for the treatment of obesity, diabetes, and related disorders.

NVP-AUY922: It is an Hsp90 inhibitor, which is in Phase I program for the treatment of a range of cancers, including solid tumors and hematological cancers. Novartis has marketing rights for this product.

Hsp90 inhib. (Oral): This product is in Phase I clinical stage and is used for the treatment of Cancer. Novartis has marketing rights for this product.

V158866 Fatty Acid Amide Hydrolase: It is a pre-clinical stage product for pain management.

The company also develops programs that inhibit Checkpoint Kinase 1 inhibitors to identify product candidates that enhance the anti-tumor efficacy of current cytotoxic agents without increasing their toxicity to non-cancerous tissues.

## Collaborations

The company has an ongoing multi-target collaboration with Servier in oncology for protein-protein interactions.

## Discontinued Operations

In July 2008, the company sold Apokyn and Vernalis Pharmaceuticals Inc, its U.S. Commercial Operations, to Ipsen SA.

## History

Vernalis plc was founded in 1986.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
