The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of VIASPACE Inc. business.

About VIASPACE Inc.

VIASPACE Inc. operates as a renewable and alternative energy company. The company grows a nonfood energy crop called Giant King Grass (GKG), which can be burned in 100% biomass power plants to generate electricity; made into pellets that can be burned together with coal to reduce carbon emissions from existing power plants. The company generates bio methane through anaerobic digestion, and can be used as a feedstock for low carbon liquid biofuels for transportation.

The company manufactures framed copyrighted artwork in China and markets and sells the artwork in the U.S. It produces disposable fuel cartridges that provide the energy source for portable electronics powered by fuel cells.\

Grass Business Division

The company, with the acquisition of Inter-Pacific arts, Inc. (IPA BVI) and Guangzhou Inter-Pacific Arts Corp. (IPA China) has a worldwide sublicense to cultivate and sell GKG, a natural hybrid, non-genetically modified, and perennial grass. GKG may also be used to produce bio methane through anaerobic digestion and as a feedstock for non-food liquid biofuels.

Framed Art Business Division

The company manufactures framed artwork in its factory in Guangzhou China, and sells the art to the U.S. retailers through its sales organization in Atlanta, Georgia. The company provides prints and frames.

Direct Methanol Fuel Cell Corporation

Direct Methanol Fuel Cell Corporation (DMFCC), a subsidiary of which the company owns a 71.4% stake, is engaged in the development of disposable fuel cell cartridges for fuel-cell powered portable electronics, such as notebook computers and mobile phones. DMFCC is also developing the global capability to manufacture, fill and distribute cartridges through a network of partners.

VIASPACE Energy Products

The company has a line of alternative energy products, including fuel cell (HS-1000 VIASENSOR) and lithium battery (BA-1000 VIASENSOR) testing equipment. In 2008, the company also entered into an agreement to sell a new line of batteries, established a global sales and distribution network for its testing and fuel cell energy supply products, received inquiries from major auto manufacturers, automotive test systems providers, fuel cell developers and instrumentation companies concerning expanded uses of these products, and identified new areas of opportunity. The company has expanded into safe lithium batteries with representation of two Asian manufacturers with focus in electric bikes, larger electric vehicles (EVs), as well as portable electronics.

Ionfinity LLC

The company's subsidiary, Ionfinity LLC, is working on a next-generation mass spectrometry (MS) technology, which could improve the application of MS for industrial process control and environmental monitoring.

Other VIASPACE Projects

The company retains a worldwide license to certain patents and patent applications in the areas of interactive radio technology.

History

VIASPACE Inc. was founded in 1998.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
