Abstracts

Victoria Gold Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Victoria Gold Corp. and its competitors. This provides our Clients with a clear understanding of Victoria Gold Corp. position in the Industry.

The report contains detailed information about Victoria Gold Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Victoria Gold Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Victoria Gold Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Victoria Gold Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Victoria Gold Corp. business.

About Victoria Gold Corp.

Victoria Gold Corp., an exploration company, engages in the exploration and development of gold properties. The company has interests in gold projects located in North Central Nevada covering approximately 50,000 hectares (120,000 acres). The company's 11 of the projects are wholly owned and it is in the process of earning a 100% interest in three other projects from Newmont Mining Inc. Its main projects are: Cove, Mill Canyon, Big Springs, and Santa Fe.

Cove

Cove is the company's gold exploration project and is located on a 6,982-hectare (17,252 acre) property which is leased from Newmont. The Phase II drilling program, which commenced in October 2007, has identified an exciting new gold bearing zone, named the Helen Zone. The Helen Zone is located 610 metres (2 000 feet) northwest of the previously mined Cove open pit and an old underground mining area. The McCoy pit is 2,042 metres (6,700 feet) from the Helen Zone.

Mill Canyon

The company has a 100% interest in the property. It is located 75 miles south east of

Battle Mountain in the Eureka and Lander counties, Nevada. Its holdings include 426 unpatented claims and one patented claim.

Big Springs project

The Big Springs project is a project which the company acquired from Gateway Gold Corp in December 2008. The Big Springs gold deposits are of the sediment-hosted 'Carlin' type. It is located 64 miles north of Elko, Independence Range, in Elko County, Nevada. Big Springs project holdings include 138 leased and owned unpatented claims.

Santa Fe

The Santa Fe project is located in southwestern Nevada within the Walker Lane physiographic province. It is located 32 miles north east of Hawthorne in Mineral County, Nevada. Santa Fe project holdings include 132 leased unpatented claims, 94 owned unpatented claims, and 24 leased patented claims.

Summit property

The Summit property is wholly owned by the company and constitutes nine square miles in the West Gold Belt in North Central Nevada. The property consists of 26 unpatented mining claims and hosts a previously mined small open pit gold mine.

Relief canyon

The Relief Canyon property is approximately 3,000 hectares in size and is located in North-Central Nevada approximately 27 km east of Lovelock. In addition to the land leased from Newmont, the company has also staked approximately 4,000 hectares of unpatented mining claims in the vicinity. The company has a minerals lease and sub-lease agreement with Newmont for the Relief Canyon property in terms of which the Company is in the process of earning up to a 100% interest the property by completing annual work commitments.

Seven Troughs

The Seven Troughs property is located approximately 40 km west of Lovelock in Nevada. It is characterized as a gold-silver vein system that crosscuts volcanic host rocks and it overlain by post-vein volcanics. The company has a minerals lease and sub-lease agreement with Newmont for the Seven Troughs property in terms of which the

company is in the process of earning up to a 100% interest the property by completing annual work commitments. The property's holdings include 246 leased unpatented claims and four leased patented claims.

Hilltop

The company has a mining lease and sub-lease agreement with Newmont for the Hilltop Slaven property in terms of which the company is in the process of earning up to a 100% in the property by completing annual work commitments. The property is located in North-Central Nevada. Victoria's Hilltop property is in a very prolific gold-bearing region. Its holdings include 62 leased unpatented claims, 111 owned unpatented claims, and 56 private sections, or parts thereof.

Mac Ridge

The Mac Ridge property is contiguous with and immediately east of the larger Big Springs claim block. It is located approximately 62 miles north of Elko, Independence Range in Elko County, Nevada. The company's holdings include 126 owned unpatented claims.

Golden Dome

The target area on the Golden Dome property is within a topographic basin that is covered by a veneer of glacial till.

Carlin East

The Carlin East property lies within the prolific Carlin Trend, approximately 5 km east of the Betze-Post deposit, a 40 million ounce gold deposit. The Carlin Trend contains approximately 20 known major gold deposits.

Dorsey Creek

The property is underlain by Pennsylvanian-Permian Overlap Assemblage siltstone and conglomerate and Schoonover Sequence clastics, greenstone and a major gabbroic sill. The property is located 67 miles north of Elko, Independence Range in the Elko County, Nevada. The company's holdings include 46 owned unpatented claims.

Toiyabe

The Toiyabe Property is located approximately 25 kilometres south of Barrick Gold Corp.'s Cortez Hills deposit in central Nevada. The Cortez Trend is defined by multiple, large gold deposits, that collectively contain approximately 25 million ounces of gold.

Island Mountain

The Island Mountain property comprises 53 claims and is located approximately 10 miles north of the Big Springs property. The company agreed to grant Arnevet Resources, Inc., a private Colorado company an option to acquire an initial 51% interest in the Island Mountain property with further options to increase its interest to a 75% interest in the property.

History

Victoria Gold Corp. was founded in 1981.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
