The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ViewCast.com Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ViewCast.com Inc. business.

About ViewCast.com Inc.

ViewCast.com, Inc., doing business as ViewCast Corporation, develops hardware and software for the capture, management, transformation, and delivery of digital media over IP and mobile networks.

Products and Services

The ViewCast solutions family includes Osprey Video line of capture cards; Niagara line of video encoding systems and related SimulStream and Niagara SCX software; ViewCast Media Platform (VMp) DAM software suite, including ViewCast Media Production; professional services and support; and other complementary products and technologies from major providers.

Osprey Video Products: The company's Osprey Video Products are designed for video acquisition/capture/streaming. It offers capture cards for streaming from the first card for Web streaming to professional-quality cards for Internet TV, including analog /digital audio & video; standard & high definition; PCI & PCI express; composite, component & SDI video, Y/C, S-Video; and balanced & unbalanced audio.

Niagara Streaming Systems and Software: The company's Niagara family of streaming

media encoders have been designed from the ground up to provide pre-configured, plug-and-play solutions enabling the user to encode and stream audio and video over the Internet or corporate network. The Niagara systems are built upon the ViewCast Osprey Video streaming capture boards. These systems include a mix of Osprey analog and digital capture boards along with its remote encoder management software (Niagara SCX) and streaming productivity software (SimulStream) resulting in a streaming media platform.

ViewCast Media Platform (VMp) Software: The company develops software solutions to manage and automate media, from production to scheduling, editing, processing, and content distribution. The available modules – VMp Live, VMp Portal and VMp Production – include support for live video sources and events, as well as archived or on-demand content. The VMp modules, as well as third-party applications, can access this functionality through a Web services application programming interface (API). VMp Production is the core module and has been a DAM solution capable of supporting the needs of large enterprises.

Marketing and Sales

The company serves various markets, including broadcasters and narrowcasters; federal, state, and local government; small, medium, and large enterprises; mobile and wireline carriers; education and training; retail and consumer package goods; content delivery networks; digital signage integrators; and other industry verticals, such as advertising, medical and insurance. Its solutions are globally marketed to media and entertainment, Internet, corporate, financial, educational, security, healthcare, governmental, and network enterprises. It also markets and sells its products and professional services worldwide directly to end-users or through indirect channels, including original equipment manufacturers (OEMs), value-added resellers (VARs), resellers, distributors, and computer system integrators. The company's major distributors are Jeff Burgess and Associates, Inc. and Graphics Distribution, Inc. Its major OEM customer is Cisco Systems, Inc.

Competition

The company's competitors include VBrick and Digital Rapids.

History

The company was founded in 1994. It was formerly known as MultiMedia Access

Corporation and changed its name to ViewCast.com, Inc. in 1999.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
