The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Virgin Blue Holdings Ltd. business.

About Virgin Blue Holdings Ltd.

Virgin Blue Holdings Limited operates in the airline industry in Australia.

Segments

Short haul operations: This segment operates using the short haul fleet of Boeing 737 aircraft, and Embraer 170 and 190 aircraft. This includes Australian domestic, New Zealand domestic, Trans-Tasman, and Pacific Island flying.

Long haul operations: This segment operates using the Boeing 777 aircraft and includes Trans-Pacific flying.

The Virgin Blue Airlines Group includes Virgin Blue, which includes Pacific Blue, Polynesian Blue, and V Australia. Together Virgin Blue, V Australia, Pacific Blue, and Polynesian Blue provide domestic and international services to approximately 45 destinations across 13 countries covering Australia, New Zealand, the Pacific, as well as North America, South East Asia, South Africa, and Indonesia.

Pacific Blue: New Zealand-based Pacific Blue provides domestic and international services. Domestically, it provides within New Zealand; and internationally, it flies to five

destinations, including Auckland, Wellington, Christchurch, Dunedin, and Queenstown.

V Australia: V Australia is an international airline and has launched flight services between Sydney and Los Angeles in February 2009, with its second route between Brisbane and Los Angeles in April 2009. On board V Australia, a 361-seat Boeing 777-300ER aircraft is a three-class cabin, including International Business with 33 lie-flat beds, and International Premium Economy with 40 club seats, as well as 288 International Economy seats.

The company also provides Blue Holidays, a holiday program, which offers products from approximately 2,000 suppliers across 10 countries and has holiday destinations, such as LA, Bali, Papua New Guinea, Solomon Islands, Queenstown, Hamilton (NZ), and Dunedin. Blue Holidays has also moved into event package options, including the Melbourne Cup Carnival, Australian Open, and the Edinburgh Military Tattoo.

Joint Venture

The company has a joint venture with the Government of Samoa with Polynesian Blue. The principal activity of Polynesian Blue Limited is the operation of airline activities between Samoa and Australia/New Zealand.

Agreements

In March 2009, V Australia and Delta Air Lines signed an Australia-U.S. interline agreement. In June 2009, V Australia and Virgin America signed an Australia-U.S. interline agreement.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
