Abstracts

Visteon Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Visteon Corp. and its competitors. This provides our Clients with a clear understanding of Visteon Corp. position in the [Auto Parts](#) Industry.

The report contains detailed information about Visteon Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Visteon Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Visteon Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Visteon Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Visteon Corp. business.

About Visteon Corp.

Visteon Corporation is a supplier of climate, interiors and electronics systems, modules, and components to automotive original equipment manufacturers (OEMs).

Products and Services

Climate Product Group

The company is a supplier in the design and manufacturing of components, modules and systems that provide automotive heating, ventilation, air conditioning, and powertrain cooling.

Climate Products

Climate Systems: The company designs and manufactures fully integrated heating, ventilation and air conditioning (HVAC) systems. Its proprietary analytical tools and systems integration expertise enables the development of climate-oriented components, sub-systems, and vehicle-level systems. Products contained in this area include evaporators, condensers, heater cores, climate controls, compressors, air handling cases, and fluid transport systems.

Powertrain Cooling Systems: The company designs and manufactures components and modules that provide cooling and thermal management for the vehicle's engine and transmission, as well as for batteries and power electronics on hybrid and electric vehicles. Products contained in this area include radiators, oil coolers, charge air coolers, exhaust gas coolers, battery and power electronics coolers and systems and fluid transport systems.

Electronics Product Group

The company is a supplier of in-vehicle entertainment, driver information, wireless communication, climate control, body and security electronics, and lighting technologies and products.

Audio / Infotainment Systems: The company produces a range of audio/infotainment systems and components to provide in-vehicle information and entertainment, including base radio/CD head units, infotainment head units with integrated DVD/navigation, audiophile systems and amplifiers, and rear seat family entertainment systems. The company's latest audio/infotainment products include digital and satellite radios, HD and DAB broadcast tuners, MACH Voice Link technology, and a range of connectivity solutions for portable devices.

Driver Information Systems: The company designs and manufacturers a range of instrument clusters and displays to assist driving, ranging from standard analog-electronic clusters to high resolution, fully-configurable, and large-format digital LCD devices for the luxury vehicle segment.

Electronic Climate Controls and Integrated Control Panels: The company designs and manufactures a line of climate control modules with capability to provide full system integration. The array of modules available varies from single zone manual electronic modules to fully automatic multiple zone modules. The company also provides integrated control panel assemblies which incorporate audio, climate and other feature controls to allow customers to deliver interior styling options and electrical architecture flexibility.

Powertrain and Feature Control Modules: The company designs and manufactures a range of powertrain and feature control modules. Powertrain control modules cover a range of applications from single-cylinder small engine control systems to fully-integrated V8/V10 engine and transmission controllers.

Lighting: The company designs and builds a variety of headlamps (projector, reflector or advanced front lighting systems), rear combination lamps, center high-mounted stop lamps and fog lamps. The company utilizes various light-generating sources, including light emitting diode, high intensity discharge and halogen-based systems.

Interiors Product Group

The company is a supplier of cockpit modules, instrument panels, door and console modules and interior trim components.

Cockpit Modules: The company's cockpit modules incorporate structural, electronic, climate control, mechanical and safety components. Customers are provided with an array of services, including advanced engineering and computer-aided design, styling concepts and modeling and in-sequence delivery of manufactured parts. The company's cockpit modules are built around its instrument panels which consist of a substrate and the optional assembly of structure, ducts, registers, passenger airbag system (integrated or conventional), finished panels and the glove box assembly.

Door Panels and Trims: The company provides a range of door panels / modules as well as various interior trim products.

Console Modules: The company's consoles deliver storage options to the consumer. The modules are interchangeable units and offer consumers a range of storage options that can be modified to their individual needs.

Services

The company's Services operations provide various transition services in support of divestiture transactions, principally related to the ACH Transactions. In addition to services provided to ACH, the company also provides certain transition services related to other divestiture transactions.

Customers

The company sells its products primarily to global vehicle manufacturers, as well as to other suppliers and assemblers. In addition, it sells products for use as aftermarket and service parts to automotive original equipment manufacturers and others for resale through independent distribution networks.

Vehicle Manufacturers: The company sells to vehicle manufacturers, including BMW, Chrysler Group LLC, Daimler AG, Ford, General Motors, Honda, Hyundai, Kia, Mazda, Mitsubishi, Nissan, PSA Peugeot Citroën, Renault, Toyota and Volkswagen, as well as new vehicle manufacturers in Asia. The company's customers include Ford and Hyundai Kia Automotive Group.

Other Customers: The company sells products to various customers in the worldwide aftermarket as replacement or enhancement parts, such as body appearance packages and in-car entertainment systems, for production and older vehicles.

Competition

The company's primary independent competitors include Alpine Electronics, Inc., Automotive Lighting Reutlingen GmbH, Behr GmbH & Co. KG, Continental AG, Delphi Corporation, Denso Corporation, Faurecia Group, Harman International AKG, Hella KGaA, International Automotive Components Group, Johnson Controls, Inc., Koito Manufacturing Co., Ltd., Magna International Inc., Robert Bosch GmbH, and Valéo S.A.

History

Visteon Corporation was founded in 2000.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
