Abstracts

VisualMED Clinical Solutions Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between VisualMED Clinical Solutions Corp. and its competitors. This provides our Clients with a clear understanding of VisualMED Clinical Solutions Corp. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about VisualMED Clinical Solutions Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for VisualMED Clinical Solutions Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The VisualMED Clinical Solutions Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes VisualMED Clinical Solutions Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of VisualMED Clinical Solutions Corp. business.

About VisualMED Clinical Solutions Corp.

VisualMED Clinical Solutions Corp., a development stage company, distributes medical software. The company's clinical information systems are designed for use in hospitals, healthcare delivery organizations and regional and national healthcare authorities. It markets technology solutions for healthcare institutions and authorities. The company is a subsidiary of Visual Healthcare Corporation.

Products

The VisualMED System

The VisualMED system is a suite of software modules that constitute a functional Clinical Information System. VisualMED is an informatics tool that enables the physician to make informed diagnostic and therapeutic decisions at the point of care. The system communicates with existing legacy systems, including Admissions (ADT), pharmacy, laboratory, radiology and Picture Archival and Communication Systems (PACS) through Health Language 7 (HL-7) interfaces. Through its interfaces, VisualMED captures clinical information available on hospitalized patient at given moment, representing the

totality of data required by the hospital's clinical staff to perform their duties. Healthcare personnel are able to access information culled from various different sources through this single software solution. The VisualMED system's functionality include:

Electronic Medical Record: The company's Electronic Medical Record system replaces paper-based activities by doctors and nurses. Patient care is prescribed and documented in an electronic media that may include wireless devices with remote access through an Internet portal. All of a patient's medical history is stored in a central database for access by the attending healthcare professionals. The information is accessed through a series of computer workstations placed in every ward, within reach of the doctors and nurses responsible for those patients.

CPOE: The CPOE module is a method of giving patient prescriptions and other medical orders in an electronic mode.

Clinical Decision Support: VisualMED decision support helps physicians validate their therapeutic decisions in real time and prescribing medication.

ADE Prevention: The company's VisualMED system helps prevent ADEs, which often cause prolonged hospitalization and death, by reducing the risk of medication side-effects, avoiding duplication of prescriptions, lab tests and radiology exams, and bringing clinical information to the attention of the physician in real time at the point of care. Through its system, the availability of medical charts is immediate and can be encrypted and transmitted worldwide through the Internet.

Medical Audits: The implementation of the VisualMED system in a hospital setting allows for an audit of medical procedures and their outcomes.

VisualMED Modules

VisualMED modules come in four classes – administrative/support, nursing, clinical, and the Electronic Medical Record.

Administrative module: VisualADMIN is the principal administrative module.

VisualADMIN allows users with the security rights to access screens that may be used to define and modify the basic architectural structure that defines the business rules for the CPOE for the six general order entry types – drugs, labs, IV solutions, image tests, nursing orders, and dressings – as well as special order entry types, such as sliding scales, drug tapers and transfusions. VisualADMIN creates and modifies decision

support algorithms that are called upon at multiple levels in the order entry sequence. These operate as background processes and maintain the ward/bed configuration of the institution, as well as a set of diagnoses, a custom set of system requisitions that may be required by the healthcare institution, a set of system user groups and user group rights and a set of system parameters that are used to determine the system configuration. The company supplies the content required for full function of the system at the time of installation. The company's customers may modify the content at any time in plain language. VisualADMIN is a required module in the setting of a minimal VisualMED installation.

Nursing module: The VisualMED nursing module (VisualNURSE) integrates physician/nursing clini

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
