The Volt Information Sciences Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Volt Information Sciences Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Volt Information Sciences Inc. business.

About Volt Information Sciences Inc.

Volt Information Sciences, Inc. provides staffing services, and telecommunications and information solutions in the United States.

The company operates through three segments: Staffing Services; Computer Systems; and Telecommunications Services.

Staffing Services Segment

Staffing Services Segment: This segment provides a range of employee staffing services to customers in North America, Europe and Asia/Pacific and has expanded its operations in Latin America.

Staffing Services segment, through two divisions, the Technical Resources division and the Administrative and Industrial division, provides a range of services in three functional areas: Staffing Solutions, IT Solutions and E-Procurement Solutions. The Technical Resources division provides Staffing Solutions, IT Solutions, and E-Procurement Solutions, and the Administrative and Industrial division provides Staffing Solutions.

Staffing Solutions

Staffing Solutions provides a range of managed staffing, temporary/contract personnel employment, and workforce solutions. This functional area is comprised of the Technical Placement (Technical) division and the Administrative and Industrial (A&I) division. The employees and contractors on assignment are on the payroll of the company for the length of their assignment, and this functional area also uses employees and subcontractors from other staffing providers (associate vendors) when necessary. This functional area also provides direct placement services and, upon agreement with customers, would allow the customer to convert the temporary employees to permanent customer positions. In addition, the company's Recruitment Process Outsourcing (RPO) services deliver hiring solutions to customers. The Technical division provides skilled employees, such as computer and other Information Technology (IT) specialties, engineering, design, scientific and technical support. The A&I division provides administrative, clerical, accounting and financial, call center and light industrial personnel.

Staffing and other workforce solutions provided by this segment are identified and branded throughout the United States as Volt Workforce Solutions, Volt Services Group, and Volt Technical Resources, throughout Europe as Volt Europe; throughout Canada as Volt Workforce Solutions Canada; in Asia/Pacific as Volt Asia Enterprises; in India as Arctern; and in Latin America as Advice (collectively the Staffing Solutions Group). Business offerings are provided to customers in various industry segments and include temporary/contract employment and referred employee management in a range of categories, including accounting, finance, administrative, engineering, human resources, information technology, life sciences, customer contact, manufacturing and assembly, technical communications and media, and warehousing and fulfillment.

The Staffing Solutions Group maintains a database of available workers to match to employer assignments. Contingent workers are provided for varying periods of time to companies and other organizations (including government agencies and non-profit entities) in a range of industries.

Contingent workers are provided to meet specific customer requirements, such as to a specific project (with employees typically being retained until its completion), to enable customers to scale their workforce according to business conditions, meet a particular need that has arisen, substitute for regular employees during vacation or sick leave, staff high turnover positions, fill in during the full-time hiring process or during a hiring freeze and staff seasonal peaks, conversions, inventory taking and offices that are

downsizing. In certain instances, the Staffing Solutions Group also provides management personnel to coordinate and manage special projects and to supervise contingent workers.

The company's staffing solutions also include managed services programs, branded as VoltSource, which provide account management in an on- or off-site capacity that fulfill customer workforce initiatives, improve overall staffing process efficiencies, and manage associate vendor relationships. Its customers, particularly those with

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
