Such information creates your awareness about principal trends of VSB Bancorp Inc. business.

About VSB Bancorp Inc.

VSB Bancorp, Inc. operates as the holding company for Victory State Bank, which provides commercial and retail banking services to individuals and businesses primarily in Staten Island, New York.

The company serves its primary market of Staten Island, New York through its five banking offices located in the West Brighton, St. George, Dongan Hills, Rosebank, and Great Kills sections of Staten Island.

Lending Activities

The company's loan portfolio includes commercial loans, including commercial secured and commercial unsecured; real estate loans, including commercial and one-to-four family; construction loans, including commercial and owner occupied one-to-four family; and other loans, including consumer loans and other loans.

Commercial Business Lending: The company originates commercial business loans directly to the professional and business community in its market area. It targets small to medium sized business, and professionals, such as lawyers, doctors, and accountants. These loans have terms of up to five years and have adjustable interest

rates and would be secured or unsecured. Secured commercial business loans would be collateralized by receivables, inventory, and other assets. These loans are either loans to individuals for which they have personal liability or loans to entities backed by the personal guarantee of principals of the borrower.

Commercial Real Estate Lending: The company originates commercial real estate loans that are secured by properties used for business purposes, such as retail stores, other mixed-use (business and residential) properties, restaurants, light industrial, and small office buildings located in its primary market area.

Construction Lending: The company's construction loans are made to builders and developers to finance the construction of one- to four-family residential properties and multi-family residential real estate properties.

Investment Portfolio

The company's investment portfolio includes the United States treasury obligations, securities of various federal agencies, certain certificates of deposits of insured banks and savings institutions, certain bankers' acceptances, repurchase agreements, and federal funds.

Deposits

The company offers various deposit products, including non-interest bearing checking accounts, money market accounts, time deposit accounts, statement savings, and NOW accounts.

History

VSB Bancorp, Inc. was founded in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
