The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Washington Real Estate Investment Trust business.

About Washington Real Estate Investment Trust

Washington Real Estate Investment Trust, a real estate investment trust (REIT), engages in the ownership and development of real estate properties in the greater Washington—Baltimore region. The company owns a diversified portfolio of general purpose office buildings, medical office buildings, industrial/flex properties, multifamily buildings and retail centers.

Portfolio

As of December 31, 2006, the company owned a diversified portfolio of 82 properties consisting of 24 general purpose office properties, 13 medical office properties, 14 retail centers, 9 multifamily properties, 22 industrial/flex properties and land held for development.

The company engages in ground-up development. The company has three ground-up development projects underway. The first is a 224-unit apartment property in Arlington, VA, referred to as Bennett Park, and the high-rise building. The second is a 75-unit

apartment property in Alexandria, VA referred to as The Clayborne Apartments. The third is its Dulles Station in Herndon, VA. The property is entitled for two office buildings totaling 540,000 square feet.

Tenants

The company's Federal government tenants include the Department of Defense, U.S. Patent and Trademark Office, Federal Bureau of Investigation, Office of Personnel Management, Secret Service, Federal Aviation Administration, NASA and the National Institutes of Health. WRIT's larger non-federal government tenants include the World Bank, Sunrise Senior Living, Inc., Sun Microsystems, INOVA Health Systems, URS Corporations, George Washington University, Lockheed Corporations, United Communications Group and Westat.

Acquisitions

During 2006, the company acquired four general purpose office buildings, eight medical office buildings, three retail centers and seven industrial properties.

Dispositions

During 2006, the company sold three office buildings and one industrial property.

Tax Status

The company has elected to be taxed as a real estate investment trust (REIT) under the Internal Revenue Code of 1986, as amended. As a result, the company generally is not subject to Federal or State income taxation at the corporate level to the extent it distributes annually at least 90% of its REIT taxable income to its shareholders and satisfies certain other requirements.

History

Washington Real Estate Investment Trust was founded in 1960.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
