The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Waste Connections Inc. business.

About Waste Connections Inc.

Waste Connections, Inc., an integrated solid waste services company, provides solid waste collection, transfer, disposal and recycling services in secondary markets. The company serves approximately two million residential, commercial, and industrial customers in Alabama, Arizona, California, Colorado, Idaho, Illinois, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Carolina, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Washington, and Wyoming.

As of December 31, 2009, the company owned or operated a network of 134 solid waste collection operations, 55 transfer stations, 37 recycling operations and 43 active landfills. In addition, it provided intermodal services for the rail haul movement of cargo and solid waste containers in the Pacific Northwest through a network of six intermodal facilities.

SOLID WASTE SERVICES

Residential, Commercial and Industrial Collection Services

The company serves approximately two million residential, commercial and industrial customers from operations in 26 states. Its services are provided under various arrangements, such as governmental certificates; franchise agreements; municipal contracts; residential subscriptions; residential contracts; and commercial and industrial service agreements.

The company provides residential solid waste services, other than those it performs under arrangements, under contracts with homeowners' associations, apartment owners, mobile home park operators or on a subscription basis with individual households. It provides commercial and industrial services, other than those it performs under customer service agreements ranging from one to five years in duration.

Landfill Disposal Services

The company owns solid waste landfills to achieve vertical integration in markets where the economic and regulatory environments make landfill ownership attractive. It owns landfills in California, Colorado, Illinois, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Nebraska, New Mexico, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, and Washington. It owns landfills in California, Mississippi, Nebraska and New Mexico.

Transfer Station Services

The company has a program to acquire, develop, own and operate transfer stations in markets proximate to its collection operations. Transfer stations receive, compact and load solid waste to be transported to landfills via truck, rail or barge. Transfer stations extend its direct-haul reach and link collection operations with distant disposal facilities. As of December 31, 2009, the company owned or operated 55 transfer stations. The company owns transfer stations in California, Colorado, Kansas, Kentucky, Montana, Nebraska, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, and Washington. In addition, it operates transfer stations in Idaho, Kentucky, Nebraska, Tennessee, Washington, and Wyoming.

Recycling Services

The company offers residential, commercial, industrial, and municipal customers recycling services for various recyclable materials, including cardboard, office paper, plastic containers, glass bottles, and ferrous and aluminum metals. It owns or operates 37 recycling processing operations and sells other collected recyclable materials to third

parties for processing before resale.

INTERMODAL SERVICES

Intermodal logistics is the movement of containers using two or more modes of transportation, including a rail or truck segment. The company has entered the intermodal services business in the Pacific Northwest through the acquisition of Northwest Container Services, Inc., which provides repositioning, storage, maintenance and repair of cargo containers for international shipping companies. It provides these services for containerized cargo primarily to international shipping companies importing and exporting goods through the Pacific Northwest. It also operates two intermodal facilities primarily for the shipment of waste by rail to distant disposal facilities that are not owned or operated by Waste Connections. As of December 31, 2009, the company owned or operated six intermodal operations in Washington and Oregon. Its fleet of double-stack railcars provides direct-line haul services among terminals in Portland, Tacoma, and Seattle. The company has contracts with the Burlington Northern Santa Fe and Union Pacific railroads for the movement of containers among its six intermodal operations. It also provides its customers container and chassis sales and leasing services.

Competition

The company's competitors include Republic Services, Inc.; and Waste Management, Inc.

History

Waste Connections, Inc. was founded in 1997.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
