The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Wealthcraft Systems, Inc. business.

About Wealthcraft Systems, Inc.

WealthCraft Systems, Inc. operates as an information technology company that engages in the design, development, marketing, and support of a technology platform for wealth management services for financial institutions, including investment advisory firms, securities brokerage firms, retail and private banks, mutual fund companies and insurance companies. The company's focus is on Asia, primarily Hong Kong, Taiwan, Singapore, and Mainland China.

The company offers financial institutions a solution for their wealth management business. Its principal business solution, Advisor Workbench, which is implemented through its proprietary technology, gives financial professionals the tools and services required to develop and expand their wealth management business, including customer relationship management, financial planning, investment research, portfolio management, and trade execution. It also offers back-office system providing order execution, order management, and portfolio and commission management. Its product offerings allow institutions to access the SWIFTNet Funds transfer system thereby allowing automated mutual fund transactions, which are generally manually performed in Asia.

Products

Advisor Workbench: Advisor Workbench is a multi-language platform providing integrated market research, financial planning, portfolio management, and customer relationship management for front-line sales teams and is targeted to medium to large size financial institutions.

ATOMS Order Management System: The company's ATOMS order management system is a back office solution for financial product distribution utilizing Microsoft's Windows Workflow Foundation. The order management system handles order routing, execution, and administration for various types of securities to meet the requirements of each financial institution; and portfolio and commissions management.

ATOMS SWIFTNet Funds Gateway: ATOMS SWIFTNet Funds Gateway is the company's middleware solution allowing automated integration and straight-through processing, known as STP, of an institution's order execution operation with SWIFTNet funds. SWIFTNet Funds is SWIFT's messaging solution to facilitate automation and straight through processing in the fund industry through the combination of standards and the SWIFTNet messaging network. STP Gateway provides a way to implement integration between order management systems operated by a financial institution and SWIFTNet Funds.

Competition

The company's competitors include Finantix, Morningstar, Excel, and ETNet.

History

WealthCraft Systems, Inc. was founded in 2003.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
