Abstracts

Websense, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Websense, Inc. and its competitors. This provides our Clients with a clear understanding of Websense, Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Websense, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Websense, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Websense, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Websense, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Websense, Inc. business.

About Websense, Inc.

Websense, Inc. provides information technology (IT) security solutions. The company's solutions include real-time Web security (including malware detection and removal), data security, and email security solutions. The company's solutions are available as software installed on standard server hardware, as software pre-installed on optimized appliances, and as a software as a service offering (SaaS). Its products and services are sold to enterprises, small and medium sized businesses (SMBs), and Internet service providers through a network of value added resellers and original equipment manufacturer (OEM) arrangements.

The company's portfolio of Web security, data security and email and messaging security software allows organizations to dynamically categorize user generated and other dynamic Web 2.0 content; prevent access to undesirable and dangerous elements on the Web, such as Web sites that contain inappropriate content or sites that download viruses, spyware, keyloggers and an ever-increasing variety of malicious code, including Web 2.0 sites with user-generated content; identify and remove malicious applications from incoming Web traffic; prevent the unauthorized use and loss of sensitive data, such as customer or employee information; filter 'spam' out of incoming email traffic; filter viruses and other malicious attachments from email and instant messages; manage the use of non-Web Internet traffic, such as peer-to-peer

communications and instant messaging; protect from spam and malware embedded in Web-based user-generated content; and control misuse of an organization's computing resources, including unauthorized downloading of high-bandwidth content.

Products and Services

The company's products protect data and users from threats to information security and productivity loss and can be grouped into three categories, such as Web security (URL filtering and real-time scanning of Web traffic), data security (DLP offering), and email and messaging security. Its Web and email security products are available as software installed on standard server hardware, as software installed on an optimized V-series appliance, or as a SaaS offering. The company's data security products are available as server-based software or integrated on its Web security appliance. It typically sells subscriptions to its products in 12, 24 or 36 month durations based on the number of seats or devices to be managed.

Web Security

The company's Web security solutions range from basic URL filtering that mitigates the productivity loss and legal exposure associated with unmanaged Web use, to its advanced network-based Web security that scans Web traffic and sites for malicious code and inappropriate content in real-time.

The company's Web security solutions integrate with an organization's network server, proxy server, switch, router or firewall and are designed to work in networks of any size and configuration. It offers four separate deployment options and a hybrid solution, including integrated deployment on a separate server that is integrated with the network gateway platform to offer pass-through filtering to maximize stability, scalability and performance; deployment utilizing a network agent to deliver pass-by filtering capabilities in a network environment; embedded deployment on an appliance that the company sells; as a SaaS deployment; and as a hybrid combination of on-premise software and SaaS application managed from a single management console.

The company's Web filtering and Web security solutions use its policy enforcement software in conjunction with its databases of categorized Web sites, protocols and malicious applications to give business managers the ability to automate the enforcement of highly customized Internet and application use policies for different users and groups within the business. The software allows organizations to manage employees' use of the Internet by filtering access to Web sites and Internet protocols

while providing multiple options for identifying, analyzing and reporting on Internet activity and the risks associated with employee computing.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
