Such information creates your awareness about principal trends of Westech Capital Corp business.

About Westech Capital Corp

Westech Capital Corp. operates as a financial services holding company. The company focuses on the following: proprietary research on distressed debt and special situation securities; trading and other brokerage services to value-based institutional and retail investors active in fixed income and equity instruments; and corporate finance and strategic advisory services to middle-market companies within its target industries.

The company focuses on wireless and wire-line telecommunications, cable, satellite, transportation, energy, alternative energy, and municipal securities. It covers approximately 60 companies and closely monitors other potential research issues.

Segments

The company conducts its business through two segments: Full service brokerage segment and Investment banking segment.

Brokerage Services

The company provides brokerage services to approximately 500 institutional clients and a network of retail clients. It offers clients the ability to buy and sell fixed income

products, equity securities, security options, mutual funds and other investment securities. The fixed income products that the company sells include distressed corporate bonds, bank notes issued by distressed companies, mortgage-backed derivative products, municipal bonds, and government and government-backed securities. The company is also a dealer in New York Stock Exchange listed securities and other non-listed securities.

Investment Banking

The company focuses on investment banking efforts, particularly in assisting public companies raise capital. It acts as placement agent for private investment in public equity, or PIPE, transactions, and exit convertible bond financing. In 2007, the company acted as placement agent for seven private placements, three of which were PIPE transactions. In connection with one of the PIPE transactions, the company also negotiated an exchange of one debt instrument for another which facilitated the subsequent raise.

Markets

The company focuses on wireless and wire-line telecommunications, cable, transportation, energy, alternative energy, homebuilders, automotive suppliers and municipal securities.

Customers

The company's brokerage client base comprises large institutional clients, such as money managers, mutual funds, hedge funds, private and public pension funds, banks, insurance companies, savings associations, state and municipal funds and high net-worth retail clients.

History

The company was founded in 1990. It was formerly known as Tejas Incorporated and changed its name to Westech Capital Corp. on August 5, 2010.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
