The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Western Copper Corp. business.

About Western Copper Corp.

Western Copper Corporation, an exploration stage mineral exploration company, engages in the acquisition and exploration of mineral properties in Canada.

Properties

The company's two advanced projects are the Carmacks Copper Project and the Casino Project. Both projects are located in Yukon Territory in Canada.

Casino Project (Yukon, Canada): The Casino porphyry copper-gold-molybdenum deposit is located 380 kilometers northwest of Whitehorse, Yukon. The Casino property is located in the Whitehorse District of Yukon Territory, Canada. It is 100% owned by CRS Copper Resources Corp., an indirect wholly-owned subsidiary of the company, and consists of 672 quartz mineral claims. These claims cover an area of approximately 11,000 hectares.

Carmacks Copper Project (Yukon, Canada): The company is an indirect owner of the Carmacks Copper Project located in Yukon, Canada. The Carmacks Copper Project hosts an oxide copper deposit, with a small gold component. The Carmacks Copper Project is 100% owned by Carmacks Copper Ltd., a wholly owned subsidiary of the

company. The project area comprises 318 quartz mineral claims. These mineral claims and leases cover an area of approximately 5,500 hectares.

Island Copper/Hushamu property (British Columbia, Canada): The Island Copper property consists of 3 blocks of mineral claims in a prospective copper-gold porphyry belt located on northern Vancouver Island, approximately 25 kilometers west of Port Hardy and 360 kilometers northwest of Vancouver, British Columbia. The mineral claim blocks are referred to as the Hushamu claims, the Apple Bay claims, and the Rupert Block. The Island Copper property is 100% owned by Moraga Resources Ltd. (Moraga), an indirect wholly-owned subsidiary of the company. The property comprises 216 mineral claims covering an area of approximately 42,700 hectares.

Redstone property (Northwest Territories, Canada): The Redstone property comprises 5 mining leases (14,100 acres) and 16 mineral claims (73,000 acres) in 6 distinct areas in the Nahanni Mining District southwest of Norman Wells in the Northwest Territories.

History

Western Copper Corporation was founded in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
