Such information creates your awareness about principal trends of Weyco Group Inc. business.

About Weyco Group Inc.

Weyco Group, Inc. engages in the distribution of men's footwear. The company's products consist of both mid-priced quality leather dress shoes which would be worn as a part of formal and traditional attire, and quality casual footwear of man-made materials or leather which would be appropriate for leisure or less formal occasions.

The company's principal brands of shoes are 'Florsheim', 'Nunn Bush', and 'Stacy Adams'. It also has other brands, including Brass Boot, Nunn Bush NXXT, SAO by Stacy Adams, and Florsheim by Duckie Brown. The company's footwear is available in a range of sizes and widths, primarily purchased to meet the needs and desires of the American male population.

Segments

The company's business is separated into two reportable segments – the North American Wholesale segment (Wholesale) and the North American Retail segment (Retail"). It also has other wholesale and retail businesses overseas which include the businesses in Australia, South Africa, and the Asia Pacific (Florsheim Australia) and its wholesale and retail businesses in Europe.

North American Wholesale segment: At wholesale, the company's shoes are marketed throughout the United States and Canada in approximately 10,000 shoe, clothing and department stores. Shoes are shipped to these retailers primarily from the Company's distribution center in Glendale, Wisconsin. The company has licensing agreements with third parties who sell its branded shoes outside of the United States and Canada, as well as licensing agreements with speciality shoe, apparel, and accessory manufacturers in the United States. Its major customer is JCPenney.

North American retail segment: As of December 31, 2009, the retail segment consisted of 36 company-operated stores in the United States and an Internet business. In addition to the sale of the company's brands of footwear in these retail stores, other branded footwear and accessories are also sold.

History

The company was founded in 1896. It was formerly known as Weyenberg Shoe Manufacturing Company and changed its name to Weyco Group, Inc. in 1990.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
