company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes World Fuel Services Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of World Fuel Services Corp. business.

About World Fuel Services Corp.

World Fuel Services Corporation engages in the marketing and sale of marine, aviation and land fuel products and related services worldwide.

Segments

The company's segments include Marine, Aviation, and Land.

Marine Segment

In Marine Segment, the company offers fuel and related services to a base of maritime customers, including international container and tanker fleets, commercial cruise lines and time-charter operators, as well as to the United States and foreign governments. It provides marine fuel and related services throughout the world under the following trade names: World Fuel, Trans-Tec, Bunkerfuels, Oil Shipping, Marine Energy, Norse Bunker, Casa Petro, Henty Oil, and Tramp Oil.

The company's marine fuel related services include management services for the procurement of fuel, cost control through the use of price hedging instruments, quality control and claims management. In its marine segment, it primarily acts as a reseller.

When acting as a reseller, the company purchases fuel from a supplier, marks it up, and resells the fuel to a customer, normally taking delivery for purchased fuel at the same place and time as the company makes delivery for fuel sold. The company extends unsecured credit to most of its customers. It also acts as a broker. When acting as a broker, the company negotiates the transaction by arranging the fuel purchase contract between the supplier and the end user, and expedites the arrangements for the delivery of fuel.

Aviation Segment

In Aviation Segment, the company offers fuel and related services to major commercial airlines, second- and third-tier airlines, cargo carriers, regional and low-cost carriers, corporate fleets, fractional operators, private aircraft, military fleets and to the United States and foreign governments.

The company's aviation-related services include fuel management, price risk management, arranging ground handling and arranging and providing international trip planning, including flight plans, weather reports and overflight permits. It also offers a private label charge card to customers in the general aviation industry. The company has developed a network that enables it to provide aviation fuel and related services throughout the world under the following trade names: World Fuel, PAFCO, PetroServicios de Mexico, Tramp Oil, PetroServicios de Costa Rica, Baseops, Airdata, and AVCARD.

Land Segment

In Land Segment, the company offers fuel and related services to petroleum distributors operating in the land transportation market, retail petroleum operators and industrial, commercial and government customers and operates a small number of retail gasoline stations. Its land-related services include management services for the procurement of fuel and price risk management. The company provides land fuel and related services throughout most of the United States as well as parts of Brazil and the United Kingdom under the following trade names: World Fuel, Tobras, Henty Oil, and Texor.

In its land segment, the company principally acts as a reseller. When acting as a reseller, the company purchases fuel from a supplier, marks it up and resells it to its customers through spot sales and contract sales. The company purchases its land fuel from suppliers throughout the United States, as well as parts of Brazil and the United Kingdom.

History

World Fuel Services Corporation was founded in 1984.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
