term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Worldwide Data Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Worldwide Data Inc. business.

### **About Worldwide Data Inc.**

Worldwide Data, Inc. (the company), or Worldwide, was incorporated in the State of Delaware in 1995. The company creates intranets/extranets for corporations, designs and develops corporate web sites and databases and creates client-specific applications. The company's services consist of (i) e-Business Consulting, (ii) Internet Solutions, (iii) Application Hosting, (iv) Providing Internet Service and (v) Customer Support.

The company's services enable it to develop, build and maintain e-commerce websites for its clients, and create revenue-generating programs for its clients that attract consumers to their respective sites. In addition, the company complements these offerings with a call center and related services that provide customer service and support. The company's plan is to focus its service offerings on the needs of small and medium-sized businesses.

### **Principal Services**

#### **e-Business Consulting**

The company advises its customers on the use of e-business solutions to reach and

support customers and markets. The goal of these solutions is typically the achievement of a qualifiable, sustainable competitive advantage within a short time frame. The company provides a road map that its client can implement immediately, as opposed to the type of high level advice that requires additional strategy planning prior to being implementable.

### Internet Solutions

The company develops and implements e-business applications for high transaction volume revenue generation activities. The company both develops custom applications and tailor packaged applications. The company designs its e-business applications to be flexible and easily scalable.

### Application Hosting

The company hosts a variety of custom and package applications, including customer relationship management applications, database applications, corporate Web sites and complex transaction intensive e-business applications. Its application hosting service enables clients to rent applications through payment of a monthly service fee instead of incurring a large one-time, initial investment.

The company's service delivery infrastructure is designed to provide its clients with a fast response time, reliability, scalability and security. The company's application hosting infrastructure is located in Toronto, Ontario. It currently provides application hosting services to approximately 100 small to medium companies.

### Internet Service Provider

The company provides subscribers with direct access to the Internet. As of December 1999, the company had approximately 2000 subscribers. Its business model is to create high user density in greater Toronto, Ontario. The company also offers value-added services for additional fees, including multiple e-mail boxes, personalized e-mail addresses and personal Web sites. The company provides subscribers with a full range of services including dedicated high speed access (such as T-1, xDSL, ATM and ISDN service), Web hosting, server co-location and domain name registration and hosting.

### Clients

The company's clients include, but are not limited to, high technology firms, insurance

brokers, traditional product/services firms, law firms and a municipality.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
