Wuhan General Group (China) Inc. Due Diligence Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Wuhan General Group (China) Inc. and its competitors. This provides our Clients with a clear understanding of Wuhan General Group (China) Inc. position in the **Heavy Machinery Industry**.

- The report contains detailed information about Wuhan General Group (China) Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.
- Another part of the report is a SWOT-analysis carried out for Wuhan General Group (China) Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.
- The Wuhan General Group (China) Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.
- In the part that describes Wuhan General Group (China) Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Wuhan General Group (China) Inc. business.

About Wuhan General Group (China) Inc.

Wuhan General Group (China), Inc., through its subsidiaries, engages in the design, development, manufacture, and sale of industrial blowers for steam-driven electrical power generation plants in the People's Republic of China. The company's subsidiaries include Wuhan Blower Co., Ltd.; Wuhan Generating Equipment Co., Ltd.; and Wuhan Sungreen Environment Protection Equipment Co., Ltd.

Products

The company engages primarily in the design, development, manufacture, and sale of industrial blowers in China. In addition, it produces steam and water turbines in its blower facilities, its turbine manufacturing facility, and in shared facilities. Steam and water turbines are manufactured principally for use in electrical and hydropower plants. It also produces blower parts and machinery equipment.

Industrial Blower Products

Axial fans: These consist of a bladed impeller (fan) in an elongated cylindrical casing and are primarily used to provide low-pressure air for larger power stations of 200 to 1,000 megawatts.

Centrifugal Blowers: These consist of a 'squirrel cage' type impeller (or rotor) in a scroll- or spiral-shaped casing. Air is drawn into the center of the squirrel cage through a hole in the side of the casing and is thrown out at a right angle by the rotational force. These blowers provide lower volumes of air, but at higher pressures, and are used in medium-sized power stations of 100 to 300 megawatts for blowing coal dust into furnaces. They are also used for aeration in sewage treatment plants.

The company, when required for noise abatement purposes, also manufactures silencers or 'mufflers' fitted to the exhaust side of centrifugal blowers. These silencers are very similar in form and function to the muffler on an automobile: the silencer interior is fitted with perforated metal trays stuffed with a sound absorbing material, such as fiberglass.

The company has relationships with the Science and Technology University of Central China, Jiaotong University, and the Acoustic Institute of the China Science Academy in the fields of fluid dynamics, material sciences, and acoustics.

Turbine Products

The company produces water turbines from its blower manufacturing facilities. It produces steam turbines at its new turbine manufacturing facility and it also produces steam turbines at its blower manufacturing facility and at a shared facility. It manufactures the following types of steam turbines:

Regular steam turbines - these turbines are designed to make maximum use of the steam, with any waste steam vented into the atmosphere through cooling towers.

Co-generation steam turbines - these turbines are designed to provide for the use of 'waste steam' by a nearby industrial plant.

The company has a relationship with Beijing 3-D for the purpose of developing new designs and manufacturing technology for the power generation equipment manufacturing industry in China. Beijing 3-D has developed 3-dimensional CAD tools for use in the design of steam and water turbines.

Customers

The company, in its blower manufacturing business, has a base of approximately 420 customers. Its turbine manufacturing business has approximately 62 customers. Its industrial parts and machinery equipment business has approximately 40 customers.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need 2-3 days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
