## Abstracts

WuXi PharmaTech (Cayman) Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between WuXi PharmaTech (Cayman) Inc. and its competitors. This provides our Clients with a clear understanding of WuXi PharmaTech (Cayman) Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about WuXi PharmaTech (Cayman) Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for WuXi PharmaTech (Cayman) Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The WuXi PharmaTech (Cayman) Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes WuXi PharmaTech (Cayman) Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of WuXi PharmaTech (Cayman) Inc. business.

### **About WuXi PharmaTech (Cayman) Inc.**

WuXi PharmaTech (Cayman) Inc., through its subsidiaries, operates as a pharmaceutical, biotechnology, and medical device research and development outsourcing company in the People's Republic of China and the United States. The company provides a portfolio of laboratory and manufacturing services throughout the R&D process to its customers, which include pharmaceutical, biotechnology, and medical device companies.

#### Services

The company operates through two segments, including Laboratory services and Manufacturing service

#### Laboratory Services Segment

This segment offers laboratory services for pharmaceutical, biotechnology and medical device companies. Laboratory services for pharmaceutical companies include discovery and medicinal chemistry, analytical chemistry, discovery biology, safety pharmacology, DMPK/ADME, bioanalytical services, process research, formulation and toxicology. All

of the AppTec testing business is included in laboratory services, which include biologics and medical device testing and manufacturing services.

## Pharmaceuticals

The company provides an integrated portfolio of pharmaceutical services.

**Discovery Chemistry:** The company's discovery chemistry services include: custom chemical synthesis, including the synthesis of intermediates, benchmark compounds, analogues for the support of medicinal chemistry programs and compound libraries. These services include the design and synthesis of focused libraries and custom analogues based on computational models and structure-based drug design.

**Analytical Chemistry:** The company's analytical chemistry group provides purification and separation services to support discovery and process chemistry. Services include chiral separation, chromatography separation, purification, natural product purification, physical property determination and isolation and analysis of impurities.

**Discovery Biology:** The company develops molecular and cellular assays to test chemical compounds that it synthesizes for biological activity. Biochemical and cell-based assays examine the activity of small-molecule compounds at receptors, enzymes, ion channels and signal transduction pathways.

**Medicinal Chemistry:** After synthesized compounds are screened in biological assays to identify hits that indicate desired biological activities, its integrated services in medicinal chemistry, including teams of biologists and scientists specializing in DMPK/ADME, identify lead compounds. The company's medicinal chemists optimize those leads—for example, by altering a molecule's structure to improve its potency, selectivity, pharmacokinetics, efficacy and safety.

**DMPK/ADME:** The company performs DMPK and ADME services to gain information about how the human body changes a drug physically and impacts its action, including its efficacy and toxicity. It offers in vivo pharmacokinetic studies in mammals by measuring drug concentrations in a range of biological matrices, including blood, urine, bile, cerebrospinal fluid and tissues. The company's in vitro ADME profiling services include analyzing the metabolic stability and permeability of drug candidates, interactions with transporters, drug-drug interactions and plasma protein binding. Its metabolite identification services include metabolite profiling, characterization and structure elucidation; bulk metabolite isolation and purification; synthesis of authentic

standards of metabolites and pharmacokinetic evaluation of parent and metabolites in preclinical and clinical samples. The company also performs pharmacokinetic/pharmacodynamic modeling studies in various rodent efficacy models, including cancer, central nervous system disorders and metabolic diseases.

**Safety Pharmacology:** The company's safety pharmacology services help to identify toxicity issues in drug compounds at the discovery stage, before preclinical and clinical testing. Its electrophysiology testing of hERG and other cardiac ion channels identifies issues of cardiotoxicity for compounds in various stages of discovery and development. The company's in vitro biochemical and cell-based assays provide useful information on compounds' pharmacology. Its toxicology tes

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
