Abstracts

XOMA Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between XOMA Ltd. and its competitors. This provides our Clients with a clear understanding of XOMA Ltd. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about XOMA Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for XOMA Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The XOMA Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes XOMA Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of XOMA Ltd. business.

About XOMA Ltd.

XOMA Ltd., a biopharmaceutical company, engages in the discovery, development, and manufacture of therapeutic antibodies designed to treat inflammatory, autoimmune, infectious and oncological diseases.

Proprietary Products

XOMA 052: The company's primary product candidate is XOMA 052, a potent monoclonal antibody with the potential to improve the treatment of patients with various diseases. XOMA 052 is a humanized IgG2 antibody with a half-life of 22 days.

In 2009, the company announced the initiation of its Phase 2 clinical program for XOMA 052 in Type 2 diabetes, Type 1 diabetes and cardiovascular disease. XOMA owns worldwide rights to the antibody and related intellectual property.

XOMA 3AB: It is an antibody drug candidate designed for the treatment of botulism poisoning, a potentially deadly muscle paralyzing disease. Its anti-botulism program is the first of its kind to combine multiple human antibodies to target a range of the most toxic botulinum toxins, including the three most toxic serotypes of botulism, Types A, B, and E. The antibodies are designed to bind to each toxin and enhance the clearance of the toxin from the body.

Preclinical Product Pipeline: The company's preclinical product pipeline include internal discovery programs, product development collaborations with other pharmaceutical and biotechnology companies.

Partnership Products

XOMA partners with organizations in research and development of new antibody products.

Therapeutic Antibodies with Takeda Pharmaceutical Company Limited (Takeda): Takeda is a partner for therapeutic monoclonal antibody discovery and development against multiple targets selected by them. In 2009, the company expanded its existing collaboration to provide Takeda with access to multiple antibody technologies, including a suite of research and development technologies and integrated information and data management systems.

Therapeutic Antibodies with Merck/Schering-Plough: Merck/Schering-Plough is a partner for therapeutic monoclonal antibody discovery and development against multiple targets selected by them.

Therapeutic Antibodies with Novartis AG (Novartis): In 2008, the company entered into a Manufacturing and Technology Transfer Agreement with Novartis. Under this agreement, XOMA has been engaged by Novartis to perform research and development, process development, manufacturing and technology transfer activities with respect to the ongoing product programs controlled by Novartis under the restructured product development collaboration.

Royalties

LUCENTIS (ranibizumab injection) by Genentech, Inc., a wholly owned member of the Roche Group (Genentech): LUCENTIS is an antibody fragment against Vascular Endothelial Growth Factor for the treatment of neovascular (wet) age-related macular degeneration. It is the marketed therapeutic product manufactured under a license using the company's bacterial cell expression technology.

RAPTIVA (efalizumab) with Genentech, Inc. (Genentech): RAPTIVA is a humanized therapeutic monoclonal antibody, designed to provide long-term control of chronic moderate-to-severe plaque psoriasis.

Agreements

In 2009, the company entered into an antibody discovery collaboration with Arana Therapeutics Limited, a wholly-owned subsidiary of Cephalon, Inc. (Arana), involving multiple proprietary XOMA antibody research and development technologies, including a new antibody phage display library and a suite of integrated information and data management systems.

In 2009, the company entered into antibody discovery collaboration with Kaketsuken, a Japanese research foundation, involving multiple proprietary XOMA antibody research and development technologies, including an antibody phage display library and a suite of integrated information and data management systems.

UCB Celltech, a branch of UCB, utilized the company's bacterial cell expression technology under license in the development of CIMZIA for the treatment of moderate-to-severe Crohn's disease in adults who have not responded to conventional therapies and for the treatment of moderate-to-severe rheumatoid arthritis in adults. CIMZIA was approved by the FDA in 2008 for the treatment of Crohn's disease and in 2009 for the treatment of rheumatoid arthritis. CIMZIA was approved in Canada for the treatment of moderate-to-severe rheumatoid arthritis in adults in 2009.

Competition

The company's competitors include Amgen, Inc.; Biovitrum AB; Cytos Biotechnology AG; Eli Lilly and Company; Novartis AG; Regeneron Pharmaceuticals, Inc.; Cangene Corporation; Emergent BioSolutions, Inc.; Abbott Laboratories; and Johnson & Johnson.

History

XOMA Ltd. was founded in 1981.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
