Abstracts

Xyratex Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Xyratex Ltd. and its competitors. This provides our Clients with a clear understanding of Xyratex Ltd. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Xyratex Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Xyratex Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Xyratex Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Xyratex Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Xyratex Ltd. business.

About Xyratex Ltd.

Xyratex Ltd. provides enterprise-class data storage solutions and storage process technology. The company designs, develops, and manufactures enabling technology that provides its customers with data storage products to support storage and data communication networks.

Segments

The company operates in two business segments, Networked Storage Solutions (NSS) and Storage Infrastructure (SI).

NSS Products

The company designs, develops, and manufactures data storage solutions. Its storage subsystems comprise modules, such as its storage controllers and disk drive enclosures, and support a range of high-speed communication technologies and cost and performance specifications. Its hard disk drive (HDD) and solid state drive (SSD) based storage subsystems support a range of high-speed communication technologies. The company's products are generally targeted at the mid-range and enterprise markets.

The company's focus areas include strategic alliances and partnerships with organizations such as the Storage Bridge Bay (SBB) working group, the SCSI Trade Association (STA), the Storage Network Industry Association (SNIA), the Green Grid, and the International Disk Drive Equipment and Materials Association (IDEMA). The company operates partnerships with key suppliers both of technology and manufacturing services.

The company's products provide the high speed digital interfaces to multiple disk drives using Fibre Channel (FC), SAS, and SATA technologies. These interfaces are provided with redundancy and improved diagnostic capabilities ensuring system availability even during maintenance. The products that the company provides to OEMs are typically referred to as JBOD (Just a Bunch of Disks) subsystems. It further refines the JBOD designation as SBOD (Switched Bunch of Disks) and EBOD (Expandable Bunch of Disks) subsystems.

The company's OneStor family of products complies with the SBB Version 2 specification and incorporates dynamic cooling, power, and modularity, allowing it and its OEM customers to create a range of storage solutions with re-use of design and components. It provides failsafe/redundant power, interconnects, cooling, and serviceability. In 2009, the company completed production release of three OneStor configurations, including its first Small Form Factor (SFF) enclosure. Its products, including OneStor and its legacy 3U and 4U platforms, support 12, 14, 16, 24, and 48 disk drive configurations.

The company's application storage systems integrate extended ATX (EATX) or Storage Bridge Bay (SBB) motherboards inside a storage enclosure integrated with the necessary device drivers, BIOS, and server and enclosure management software modules to fulfill many different storage application requirements. Various network connections can be integrated into the storage enclosures to address the requirements of the healthcare, video, IP storage, data deduplication, and cloud storage markets.

The company's storage subsystems are internally managed by a range of firmware modules and features. These firmware modules can monitor the internal performance of the subsystem, create internal environments, communicate independently with remote service, support organizations, and integrate with its customers' controlling software and management technology through interfaces.

The company also provides RAID technology to protect users from failure of disk drives. Its RAID technology provides solutions with a range of features, including RAID 6 (the

ability to deliver data even with two concurrent disk drive faults). Its products include its F6500 SBB-based RAID controller which supports its OneStor family of products. These products are SAN 'solutions' particularly suited to sell to vertical-focused OEMs who do not have their own RAID data protected controllers.

SI Products

The company's SI product portfolio includes process, inspection, and test equipment utilized in disk drive head fabrication, disk drive substrate, and media manufacturing and disk drive final assembly and test. The company provides HDD production test equipment, media write equipment, media cleaning systems, and media automation.

Disk D

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
