About Yamato Holdings Co., Ltd.

Yamato Holdings Co., Ltd., through its subsidiaries, provides delivery, BIZ-logistics, home convenience, e-business, financial, and other services in Japan, the United States, Europe, and Asia.

Segments

Delivery Business Segment

The Delivery Business Segment involves in small parcel delivery services for the general public and corporations, focusing on Takkyubin (door-to-door parcel delivery) and Kuroneko Mail. It also offers value-added services, such as Cool Takkyubin and Takkyubin Collect. The company also offers Kuroneko Members, a membership-based service for individual customers; and Takkyubin Easy Address Label Issuance Service.

BIZ-Logistics Segment

The BIZ-Logistics Segment handles logistic, international freight services, and other business to business distribution operations. This segment enables corporate clients to manage their supply chains.

The company offers the Kuroneko Yamato Recall Support Service, which is a service for corporate clients who need to recall or voluntarily collect their products, including notification, acceptance of recall requests, and collection on behalf of the client. It also offers Export Factory, which is a trade logistics service that supports customers' export activities. An integrated outsourced service, it combines multiple functions, including weighing and packaging, customs clearance, and arrangement for overseas delivery.

Home Convenience Segment

The Home Convenience Segment provides moving, lifestyle support, and distribution services. The company offers Household Takkyubin, a service that combines delivery and installation functions.

e-Business Segment

The e-Business Segment engages in the provision of a range of information services for corporations, including ASP services and information system development. The company offers e-Logistics Tracing Solution for customers who require traceability of specific items. Through management and sharing of tracking data, this service realizes optimization by enabling customers to visualize the movement of products shipped and thus cut excessive inventories.

Financial Business Segment

The Financial Business Segment offers settlement and other financial services primarily to consumers and business customers. The company offers Payment Slip Issuance Service, which provides support for customers engaged in the mail-order business, from issuance of payment slips to delivery and collection of payment. It also offers electronic money (Edy) settlement service with various payment options under its Takkyubin Collect service. It also offers Kuroneko Mail Collect, which issues a payment slip that includes the address label.

Other Business Segment

The Other Business Segment carries out vehicle maintenance primarily by Yamato Autoworks Co., Ltd., and is primarily responsible for the JITBOX Charter service, mainly operated by Box Charter Co., Ltd.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
