Such information creates your awareness about principal trends of Yapi Ve Kredi Bankasi AS business.

About Yapi Ve Kredi Bankasi AS

Yapi Ve Kredi Bankasi AS (the bank) operates as a full-service financial institution. The bank engages in corporate, retail, international and investment banking businesses. As of December 31, 2003, the bank delivered its services through a network of 425 domestic branches, 1,406 ATMs, a Call Center, the Internet, as well as an offshore banking branch in Bahrain, four overseas representative offices and subsidiaries in Germany, the Netherlands and the Russian Federation.

The bank offers various services, such as customer deposit-taking, consumer and corporate lending, foreign trade transactions, investment banking and mutual fund management, credit and debit cards, electronic, telephone and internet banking and payment services.

The bank, through its subsidiaries, operates various other businesses, including life and non-life insurance; leasing; factoring; and investment banking. It also has subsidiaries, associates, and joint ventures in information technology, tourism, telecommunication, and construction sectors operating in Turkey and abroad. In addition, the bank provides payroll distribution, automatic bill payments and social security premium collection services.

Treasury & Capital Markets

In all funds management products, Yap Kredi offers customers transaction options on nearly every scale through virtually every possible delivery channel. It offers Mutual fund equity, corporate equity, deposits, T-bills, eurobonds, government bonds, foreign currency bonds, repos, and many other investment products at its branches and via alternative delivery channels, such as telephone banking, Internet banking and ATM.

Corporate Banking

TRIO is a payment vehicle for the corporate banking segment. TRIO is used by retailers when they buy goods from wholesalers and substitutes the functions of letters of guarantee, cash, checks and promissory notes, which they use in these transactions.

Commercial Banking

Yap Kredi's portfolio of commercial banking customers consist of small- and medium-sized companies. The bank's Commercial Teleweb makes it possible for banking transactions to be performed easily, speedily and securely over the Internet.

Retail Banking

The Automatic Cash Management System enabled the management of the deposit accounts in the most efficient way. Under this system, deposit accounts with Yapi Kredi are linked with portfolio accounts and at the end of each day the outstanding balance is converted into YKB Type B Liquid Mutual Funds. Through this system the exact amount of mutual funds are sold to make automatic payments like utility bills, rent, installments and credit card.

In 2003, within private services, Personal Telecard and Emergency Health Service were developed for Personal Banking customers. In University Banking, kampusce.com was established to improve the bank's channels of communications with university students.

History

Yapi Ve Kredi Bankasi AS was established in 1944.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
