The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Zargon Energy Trust business.

About Zargon Energy Trust

Zargon Energy Trust operates as an open-end investment trust. The company, through its direct and indirect subsidiaries and partnerships, engages in acquiring, developing, exploring, exploiting, and holding interests in petroleum and natural gas properties and related assets. The company's reserves are in Canada in the provinces of Alberta, Saskatchewan, and Manitoba; and in the United States in North Dakota.

OIL AND GAS PROPERTIES

West Central Alberta

The company's West Central Alberta core area is located north west of Edmonton in central Alberta and comprises three natural gas producing regions that provide the company with a varied inventory of natural gas exploration and development opportunities. The company's 32,000 net acres of undeveloped land in the Greater Highvale property is centered on the Paul First Nation land block located west of Edmonton.

Alberta Plains

The company's Jarrow property is a significant producing natural gas property where it produced 14.63 million cubic feet of natural gas per day and 68 barrels of oil and liquids per day in 2008 primarily from the Mannville and Viking formations.

The Hamilton Lake property produced 2.97 million cubic feet of natural gas per day and 75 barrels of oil and liquids per day in 2008 from the Mannville and Viking formations. The property's major asset is a 48 thousand net acre developed and undeveloped unit.

The Bellshill Lake oil property is located immediately south of Jarrow and was acquired as part of the acquisition of Rival Energy Ltd. This property provides significant oil development drilling, exploitation drilling, and production optimization opportunities from existing wells. In 2008, the Bellshill property produced approximately 543 barrels of per day of 27 degree API oil and 0.20 million cubic feet of natural gas per day.

The Taber oil property is an oil-in-place property that brings significant future exploitation potential in terms of horizontal development wells and waterflood modifications and implementations. In 2008, this property produced 553 barrels of oil and liquids per day and 0.50 million cubic feet of natural gas per day.

Williston Basin

The Williston Basin properties are located in relatively close proximity in south east Saskatchewan, south west Manitoba and in the northern counties of the State of North Dakota. The properties produce light and medium gravity oil from carbonate reservoirs at depths up to 1,500 meters.

History

Zargon Energy Trust was founded in 1987.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
