The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Zoro Mining Corp. business.

About Zoro Mining Corp.

Zoro Mining Corp., an exploration stage company, engages in the acquisition, exploration, and development of mineral properties in South America and Mexico.

Don Beno Property, Copiapó, Chile

The company has a 100% interest in approximately 14,574 acres of exploration properties, which covers the Don Beno property, located in Atacama Region III, Chile. As of September 9, 2008, the company had completed Phase I, a 1930 meter (5,790 feet) diamond drilling program at Don Beno.

Escondida Project, Copiapó, Chile

The company has a 100% interest in approximately 5,063 acres of exploration properties which covers the Escondida property. The Escondida precious metals project is located in Chile's 3rd Region, (or Atacama Region).

The Yura Project, Arequipa, Peru

The company has a 100% interest in approximately 4,940 acres of exploration

properties which covers the Yura property.

Las Animas Project, Sonora, Mexico

The company has significant position in a mineral property located in the Mexican State of Sonora. The property consists of three separate claims blocks totaling approximately 6,822 acres.

Significant Events

On October 9, 2009, Zoro Mining Corp. entered into a Mineral Assets Option Agreement with Sociedad Gareste Limitada and other vendors, for the proposed acquisition by Zoro of the Piedra Parada and Fritis precious metals projects located in Chile's Atacama Region III. The 12 Piedra Parada property mineral exploration concessions cover nearly 2900 hectares in a prototypical salar-a dry lake bed with inflow waters and subsurface brines.

The company has entered into an asset purchase agreement with two vending parties to acquire a 100% interest in three property mineral exploration concessions covering approximately 1,500 hectares as an extension to the company's existing Yura gold prospect located 30 kilometers west of Arequipa, Peru. The Fortuna Properties target precious metals.

History

Zoro Mining Corp. was founded in 2004.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
