The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Zunicom Inc. business.

About Zunicom Inc.

Zunicom, Inc., through its wholly owned subsidiary, AlphaNet Hospitality Systems, Inc., provides business communication services to the hospitality industry.

Products

The company provides a suite of products that meet the demand for self service business centers through its offerings of The Office, Laptop Connect, and GuestPrint. The Office is a credit card activated business center, which allows guests to access the Internet and email, as well as print, copy, fax, and scan. Microsoft Office is available with a suite of programs, as well as other commonly used tools, such as Acrobat Reader. Its LapTop Connect allows hotel guests the ability to connect their laptop computers to Internet access points located in the business center.

Other

The company, through its 40.6% interest in Universal Power Group, Inc. (UPG), also provides third-party logistics and supply chain management services; and supplies and distributes portable power supply products, such as batteries, security system components, and related products and accessories. UPG's principal product lines include batteries of various chemistries, battery chargers, and related accessories;

portable battery-powered products, such as jump starters and 12-volt power accessories; security system components, such as alarm panels, perimeter access controls, horns, sirens, speakers, transformers, cabling, and other components; and electro-magnetic devices, capacitors, relays, and passive electronic components.

UPG's third-party logistics services, principally supply chain management solutions and other value-added services, are designed to help customers optimize performance by allowing them to outsource supply chain management functions. UPG's supply chain management services include inventory sourcing and procurement, warehousing, and fulfillment. UPG's value-added services include custom battery pack assembly, custom kitting and packing, private labeling, component design and engineering, graphic design, and sales and marketing. UPG also distributes batteries and portable power products under various manufacturers' and private labels, as well as under its own proprietary brands. UPG's customers include OEMs, distributors, and both online and traditional retailers. The products UPG sources, manages and distributes are used in a range of industries, including automotive, consumer goods, electronics and appliances, marine and medical instrumentation, computer and computer-related products, office and home office equipment, security and surveillance equipment, and telecommunications equipment, and other portable communication devices.

Suppliers

The company obtains hardware and software necessary for The Office product line from manufacturers, including Brother, HP, Cherry, and Viewsonic.

Customers

The company sells or places its product line to both chain/management companies and individual properties. It provides services to chains, such as Hilton, Hyatt, and Westin.

History

Zunicom, Inc. was founded in 1968.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
