Abstracts

This report examines industry sentiment toward artificial intelligence in August 2026 across Adoption, Disruption, Use Cases, and Spend. It highlights a recovery in overall AI sentiment and growing confidence in practical, business-focused applications, while examining differences in AI adoption and implementation across industries. The analysis covers the evolving role of AI in improving operational performance, decision-making, innovation, and business processes, with a focus on areas where data, infrastructure, and economic conditions support wider adoption.

Report Scope

The August 2026 AI Sentiment Index looks at how industries are assessing the growing role of artificial intelligence in business. It measures sentiment across Adoption, Disruption, Use Cases, and Spend, while highlighting changes in industry confidence and priorities. The report also explores where businesses are finding practical value in AI and how they are balancing opportunities with investment and implementation needs.

Report Includes

An overview of the AI Sentiment Index for August 2026

Insights into the changing market landscape based on four key dimensions - Adoption, Disruption, Spend and Use Case

Assessment of the AI Adoption Sentiment Index showing how industries are incorporating AI into business operations and strategic initiatives
