## Abstracts

### Report Scope:

This report will cover the global algae biofuel industry. Definitive and detailed estimates and forecasts of the worldwide markets are provided, followed by a detailed analysis of various regions, countries and applications. This report covers the present scenario and growth prospects of the global algae biofuel market for 2022-2027.

Since most algae biofuel production is in the R&D, pilot stage and industrial scale, the market size is calculated based on industrial scale capacity, future expansion plans and considerable literature research. The report also presents the market's competitive landscape and features a detailed profile of the key players operating in the market.

Furthermore, the study also discusses market dynamics such as drivers, restraints, opportunities and challenges. It also examines emerging trends and their impact on current and future market dynamics.

The report consists of seven chapters:

Chapter 1 defines algae and gives a general introduction to the report.

Chapter 2 discusses the global algae biofuel market and provides an industry overview.

Chapter 3 presents an overview of types of algae strain, their yield and the technology used in cultivating, harvesting and extraction of algae oil.

Chapter 4 presents an overview of the algae biofuel market, assesses market trends, drivers and challenges. It also assesses the impact of COVID-19 and the

Russia-Ukraine war on the market.

Chapter 5 discusses the algae biofuel market by region and gives the market forecast for 2027.

Chapter 6 discusses the market by application and provides a market forecast for 2027.

Chapter 7 provides profiles of the 10 leading companies in the algae biofuel market.

A negative economic outlook was assumed in all the segments for 2020 due to the COVID-19 pandemic. The Russia-Ukraine war that started in February 2022 has also been considered in this report to produce a negative economic impact on this market. However, growing economies such as India, Malaysia and Indonesia are attracting key companies in the algae biofuel market and are likely to be responsible for increased consumer spending.
