Report Scope:

In this report, the market is segmented by component, application and geography. The component segment is further broken down into hardware and software.

The software segment only includes those software components or audio codec algorithms that are implemented on hardware IC/chips to enable audio codec functionalities in Bluetooth-enabled consumer electronic devices. Thus, the software segment only focusses on software audio codecs which are used in Bluetooth devices (known as Bluetooth audio codecs) such as SBC, LDAC, LC3, and AAC.

This report provides an overview of the global audio codec market and analyzes market trends and challenges that will affect the vendor landscape. Using 2019 as the base year, the report provides market projections for the forecast period 2020 through 2025. This report also takes into consideration the economic slowdown caused by lockdowns across the world due to the COVID-19 pandemic.
