## Abstracts

### Report Scope:

This report aims to provide a comprehensive study of the global market for bariatric surgery, including services and devices. It provides a detailed description of the different types of bariatric procedures (invasive and noninvasive) and relevant devices.

Bariatric procedures include sleeve gastrectomy, gastric bypass, gastric banding, one anastomosis gastric bypass and others. Bariatric devices are segmented into assisting and implantable devices. This report also covers a detailed study of conditions, obesity and diabetes, which are the major reasons for the uptake of bariatric procedures, worldwide.

An in-depth analysis of the global market for bariatric surgery and devices includes historical data and market projection on sales by procedure type, device type, end-user and region. The regulatory aspects concerning the bariatric surgery market include marketed and pipeline (R&D) products along with description, regulatory status and clinical trials and reimbursement.

For in-depth understanding of the market, profiles of market participants and associations, competitive landscape, key competitors and respective market shares have been provided in this report. This report also discusses driving and restraining factors of the global bariatric surgery and device market and trends and opportunities in the market.

### Report Includes:

44 data tables and 22 additional tables

An overview of the global market for services and devices for bariatric surgery

Estimation of the market size and analyses of global market trends, with data from 2019-2020, and projections of compound annual growth rates (CAGRs) through 2025

Evaluation of market size and forecast, technological advancements within the industry and market share analysis of services and devices of bariatric surgery based on procedure type, device type, end user, and region

An introduction to obesity, common tools to diagnose obesity including BMI, waist circumference, and skinfold thickness, and discussion on risk factors related to obesity such as type 2 diabetes

Discussion on economic burden and epidemiology of obesity and detailed description of diabetes including symptoms and risk factors, epidemiology and medication and insulin therapy

Description of bariatric surgery procedures including laparoscopic, endoscopic, and open surgery and discussion on benefits, limitations and complications of bariatric surgeries, and information on bariatric surgery devices such as assisting, suturing and stapling devices

Coverage of key marketed, pipeline and abandoned products within bariatric devices technologies; and insight into the reimbursement scenario and international classification of diseases and codes for key bariatric procedures

Global company share analysis of the leading companies dealing in bariatric assisting devices and bariatric implantable devices

Company profiles of major industry players, including Apollo Endosurgery Inc., Boston Scientific Corp., Cook Medical LLC, Ethicon Endo-Surgery (a subsidiary of Johnson & Johnson), Medtronic Plc and ReShape Lifesciences

## **CHAPTER 7 MARKET BREAKDOWN BY SERVICE/DEVICE TYPE**

Bariatric Services/Procedures  
Global Market for Bariatric Devices  
Assisting Bariatric Devices  
Implantable Devices

## **CHAPTER 8 MARKET BREAKDOWN BY END USER**

Bariatric Services/Procedures

Bariatric Services/Procedures by End User  
North American End-User Market  
European End-User Market  
Asian End-User Market  
ROW End-User Market  
Global Market for Bariatric Devices by End User  
North American Market for Bariatric Device End Users  
European Market for Bariatric Device End Users  
Asian Market for Bariatric Device End Users  
ROW Market for Bariatric Device End Users

## **CHAPTER 9 MARKET BREAKDOWN BY REGION**

Global Bariatric Services/Procedures  
Bariatric Services/Procedures by Region  
North America  
Europe  
Asia
