Abstracts

Report Scope:

Chronic disease management includes numerous drugs and medical device-based techniques used for the management of various chronic diseases. This report is an analytical business tool with the primary purpose of providing a thorough evaluation of the global market for chronic disease management through various therapeutics and advanced device technologies.

The current report will provide detailed exposure to chronic disease management market. This report analyzes the market trends of chronic disease management with data from 2020, estimates from 2021, projections of compound annual growth rates through 2026 (forecast period 2021 – 2026), and regional markets of the chronic disease management. This report will highlight the current and future market potential of chronic disease management along with a detailed analysis of the competitive environment. Regulatory scenario, drivers, restrains, and opportunities will be covered in the current report. The report also covers market projections for 2026, and market Shares of key market players.

The market has been segmented based on product segment, segment, disease type, treatment provider, and geography. Based on product segment, the market in this report is segmented into pharmaceutical drugs & biologics (drugs and biologics) and medical device technologies and applications (traditional devices and wearable devices and applications). On the basis of disease type the market is segmented into cancer, diabetes, musculoskeletal, cardiovascular, HIV and related conditions, gastro-intestinal, respiratory, neurology, psychiatry, and other disorders. Based on the treatment adherence, the market in this report is segmented into treatment adherence systems

and treatment adherence applications (cloud-based). By delivery technology the chronic disease management market is segmented into injectable and parenteral delivery, oral delivery, nasal & pulmonary, transdermal and others. On the basis of treatment provider, the market is segmented into hospitals & others and home care.

The regional market analysis of chronic disease management is also covered in this report. The market has been segmented into various major regions including North America, Europe, Asia-Pacific, and rest of world regions. Detailed analysis of major countries such as the U.S., Germany, the U.K., Italy, France, Japan, China, and India are going to be covered within the regional segment. For market estimates, data are going to be provided for 2020 because the base year, with estimates for 2021 and forecast value for 2026.

Report Includes:

99 data tables

An up-to-date review and analysis of the global market for chronic disease management therapeutics and device technologies

Analyses of the global market trends, with data from 2020, estimates for 2021, and projections of compound annual growth rates (CAGRs) through 2026

Evaluation and forecast the overall market size, forecasted growth trends, and corresponding market share analysis by product category, disease type, delivery technology, treatment adherence, treatment provider, and region

Insight into the current state of chronic diseases and disorders, with an emphasis on advance needle-free drug delivery technologies, diagnostic methods, and smart device technologies that support effective disease state management

Regulatory structure for pharmaceuticals and medical devices, pricing and reimbursement structure, marketed and pipeline products, and major developments influencing the market

Key merger and acquisition deals, development of commercially viable products and technologies, and other strategic alliances within the industry

Profile descriptions of the leading global players including Abbott, AbbVie Inc., Amgen Inc., Bayer AG, Boston Scientific Corp., Dr. Reddy's Laboratories Ltd., F. Hoffmann, GlaxoSmithKline PLC, Johnson & Johnson, Medtronic, Novartis, Sanofi, Pfizer and Takeda

CHAPTER 4 IMPACT OF COVID-19

Overview

COVID-19 Crisis

Impact on Market for Chronic Diseases Management

Current Outlook

CHAPTER 5 CHRONIC DISEASES: THERAPEUTICS

Therapeutics and Chronic Diseases

Generic Drugs and Chronic Diseases

Generic Drugs vs. Branded Drugs

Continued Resistance for Generics

Biologics and Biosimilars for Immune-Mediated Chronic Diseases

Cancer and Targeted Therapy

Clinical Need for Therapeutics

Therapeutics and Cost Burden

Chronic Diseases and Managed Care

Key Marketed and Pipeline Products

Key Marketed Products

Key Pipeline/R&D Products

Unmet Need

Current Challenges and Future Developments

CHAPTER 6 DEVICE TECHNOLOGIES AND APPLICATIONS

Medical Devices and Chronic Disease Management

Clinical and Market Need of Digital Therapeutics

Types of Device Technologies

Diagnostic and Monitoring Devices

Therapeutic Devices and Technologies

Key Marketed and R&D/Pipeline Products

Diagnostic and Monitoring Devices

Therapeutic Devices and Technologies

Advantages of Chronic Disease Management via Digital Care

Unmet Need
