## Abstracts

### REPORT SCOPE:

The scope of the study includes discussion of current and upcoming trends of cling film. In addition, raw material analysis, product life cycle analysis and competitive landscape will also be included within the scope of this study. Furthermore, understanding demand as well as supply side market trends of cling film and tracking future growth potential of the market will also be covered under the scope of the study.

Within the type of cling film, we have included PVC, PE and PVDC under the scope of the study. No other type of cling film has been considered in this study.

Within the thickness of cling film, we have considered up to 8 microns, 8 microns to 15 microns, and greater than 15 microns. Apart from mentioned thickness, no other thickness of cling film has been considered in this study.

Within the design of cling film, we have included printed and non-printed cling film. Apart from these mentioned designs, no other designs are taken under the scope of this report.

Under the application of cling film, we have included food packaging, stationary products packaging, industrial and others (processing industry and medical applications). Apart from these mentioned applications, no other applications of cling film are considered in this study.

Under end use, cling film with applications in industries including food and beverages, consumer goods, industrial, and others (processing industries and medical sector) have been considered under the scope of this report. Apart from the mentioned end use segments, no other end uses of cling film are taken under consideration within the

scope of this report.

Estimated values are based on manufacturers' total revenues. For calculating volume metric, kilotons have been used as a base unit. Therefore, volume has been presented in kilotons. 1 kiloton is equivalent to 1 million kg. 1 kiloton = 1,000 metric ton. 1 metric ton = 2,204.62 pounds

## **REPORT INCLUDES:**

175 tables

An overview of the global markets and technologies for cling films

Analyses of global market trends, with data from 2017, 2018, and projections of CAGRs through 2023

A look into definition, evolution and future outlook and expectations of cling film market

Identification of potential applications of cling films in industries including food & beverages, semiconductor & electronics, and consumer goods

Description of raw material analysis, product lifecycle analysis and key issues in global cling film market

Profiles of the major players in the market, including AEP Industries, Inc., Berry Global, Inc., E. I. DU Pont De Nemours and Co., Folien GmbH, Mirel Vratimov A.S., Mitsubishi Chemical Holdings Corp., Scientex Berhad and Wrap Film Systems Ltd.
