## Abstracts

### Report Scope

This report analyzes the Middle East and North Africa (MENA) cold chain market, using 2024 as the base year, and provides market projections from 2025 through 2030, including compound annual growth rate (CAGR) estimates. It covers key market dynamics, technological advances, regulatory factors and business considerations shaping the cold chain industry. The report examines market drivers, challenges and trends across various applications, including food, pharmaceuticals and chemicals.

The market is segmented by temperature range, technology, applications and services, offering insights into storage, transportation and monitoring solutions. Additionally, the report evaluates regional trends and investment opportunities, highlighting factors influencing market expansion in different MENA countries. All values in the report are in USD.

Turkey and Israel are excluded from this analysis due to their well-established cold chain infrastructure, which differs significantly from other MENA nations. Including them would distort the market assessment, as their challenges and growth potential differ from those of the emerging markets in the region. By focusing on developing cold chain markets, this report provides a strategic perspective for businesses looking to expand their footprint in MENA's evolving logistics landscape.

### Report Includes
