Report Scope:

The scope of this study encompasses the current and forecast markets for glucose monitoring, connected pumps and pens, SMBG meters, and test strips. The covered segments are CGM transmitters, receivers and sensors, smart pumps and pens, and self-monitoring blood glucose (SMBG) equipment and test strips. The test strip market numbers refer to all types of test strips with SMBG, and not just test strips as used by CGM users. CGM users also use test strips, but theoretically only for calibrating their CGM devices. The report also includes discussions of the market opportunities, patent scenario, market projections and market shares, competitive landscape, and the key company profiles. The report would also cover the COVID-19 impact on the CGM market.
