Report Scope:

The rising prevalence of cardiovascular diseases (CVDs) due to changed lifestyles has fueled the market for defibrillators. Lifestyle diseases such as hypertension, obesity, type 2 diabetes, and dyslipidemia are the major risk factors for CVD. CVD prevalence is also increasing due to the growing geriatric population, so the incidence of heart disease is expected to increase. During the last few years, significant improvements have been made in defibrillators. The development of subcutaneous implantable cardioverter-defibrillator (S-ICDs) and cardiac resynchronization therapy defibrillators (CRT-Ds) is expected to drive market growth during the forecast period. High growth opportunities for defibrillators in emerging markets have also fueled the demand.

This report provides a brief exposure to the defibrillators global market. This report highlights the current and future market potential for this medical equipment and offers a brief analysis of the market's drivers, challenges, and opportunities. Revenues are broken down by region, type, and end user. For market estimates, data has been provided for 2019, 2020 and 2021 (as the base year), projections for 2022, and a forecast for 2027.
