Report Scope:

This report provides a detailed analysis of the dental implant market, segmented according to the type of material used, product type, value, end user and region. On the basis of materials, the market is divided into titanium and zirconium implants. On the basis of implant type, the market is divided into tapered and parallel-walled dental implants. Based on the value, they are divided into premium and non-premium dental implants. On the basis of end users, the market is divided into dental clinics and hospitals, dental laboratories and dental colleges and research establishments, and on the basis of region, the market is segmented into North America, Europe, Asia-Pacific, Middle East and Africa, and South America.

The report also includes a discussion of the major drivers and global dynamics, along with the political, economic, social and technological factors that impact the market. The report provides market size estimates for the year 2017 (considered as a base year), 2018, and a forecast for 2023. Market estimates and forecast figures are provided for all major market segments. A discussion of the major players is included in the competitive landscape section, which provides trends in product launches, collaborations, mergers and acquisitions, and other agreements.

The report concludes with a special focus on the company profiles and includes detailed profiles of the major vendors in the dental implant market.
