## Abstracts

### Report Scope:

The current report offers a detailed picture of the dermatology device market. It covers the devices used for various dermatology treatments such as skin diseases, skin cancers, skin resurfacing and other skin conditions. The report does not cover the treatments of fat grafting, liposuction, skin tightening, body contouring, rhinoplasty and other surgical treatments or procedures.

The report highlights the current and future market potential of dermatology devices and provides a detailed analysis of the competitive landscape, regulatory scenario, drivers, restraints, opportunities, and trends in the market with projections through 2025.

The report estimates the market shares of dermatology devices based on the type of devices application and geography. Based on device type, the market is segmented into lasers, light therapy devices, microdermabrasion devices, energy-based therapy devices and microneedling. Based on application, the market is segmented into skin rejuvenation, skin cancer (basal cell carcinoma, squamous cell carcinoma and malignant melanoma), tattoo removal, hair removal and skin diseases (acne, pigmented and vascular, psoriasis, scar, warts and skin tags, and wrinkles).

By geography, the market is segmented into North America, Europe, Asia-Pacific, South America, and the Middle East and Africa, and covers these regions by country. For market estimates, data has been provided for the year 2019 as the base year, with forecasts for 2020 through 2025. Estimated values used are based on revenue generation by the manufacturers. Projected and forecasted revenue values are in constant U.S. dollars, unadjusted for inflation.
