REPORT SCOPE

The research study includes market information on DRaaS and its key segments including data source, user type, industry vertical and country.

The implementation of DRaaS in various industries is the core focus of the report, covering BFSI healthcare, retail and e-commerce, manufacturing, government and education, IT and telecom, and others. Other industries include travel and tourism, energy and utilities, and construction.

The DRaaS market is also segmented into small and medium enterprises (SMEs) and large enterprises based on the number of employees. For example, SMEs is designated to enterprises composed of 10 to 500 employees.

When it comes to data centers, the market is divided into physical environments and the cloud. Physical environments consist of on-premise data centers where the data is in private storage at the user's own premise or base. In contrast, the cloud environment is virtual storage where the data is accessed from the vendor's datacenter or third-party service provider.

The report also includes a discussion of major vendors in China, India, Japan, Australia, Singapore, South Korea and the other remaining countries in the Asia-Pacific region. Furthermore, it explains the major drivers, trends and dynamics that are shaping the market as a whole.
