Abstracts

REPORT SCOPE:

The report presents an overview of the global market for the drill pipes and analyses of global market trends, with data from the base year 2016, and estimates for 2017 to 2022 with projections of CAGR.

The report includes discussion of technological, regulatory, and economic trends that affect the market. Further, it explains the major drivers and regional dynamics of the global drill pipes market and current trends within the industry.

The report includes discussion of end use deployment such as onshore and offshore locations, along with the discussion on the grade type in various regions such as North America, Europe, Asia- Pacific, Middle East and Africa and South America.

The report concludes with a special focus on the vendor landscape and includes detailed profiles of the major vendors in the global Drill Pipes market.

REPORT INCLUDES:

24 data tables and 18 additional tables

A detailed overview and an industry analysis of the drill pipes market within the industry

Analyses of global market trends, with data from 2016 and 2017, and projections of compound annual growth rates (CAGRs) through 2022

Information on factors currently driving and restraining the growth of drill pipes

market along with opportunities that will affect the future of the market

Insight into environmental concerns and regulatory issues related to drill pipe market

Company profiles of the major market players in the market, including Drill Pipe International, Hilong group, Jindal Saw Ltd., National Oilwell Varco, Oil Country Tubular (Octl), Ltd., The Superior Drill Pipe Manufacturing, Inc., United States Steel Corp. and Vallourec S.A

SUMMARY

The drill pipe is a hollow tube made mostly of steel or aluminum, fitted with threaded ends called tool joints. The drill pipe connects the rig equipment at the surface with the bottom hole assembly (BHA) and bit. The drill pipe pumps drill fluids to the bit, and rotates, raises and lowers the bottom hole assembly. Available in numerous sizes, the drill pipe typically is 30 to 33 feet long. It provides weight and strength to the well bore. The drill pipe is case hardened to support its own weight when sent a mile long into the earth's surface. It reduces the fatigue failure of the BHA and the additional weight of the drill bit. For onshore and offshore drilled wells, drill pipes mostly compose drilling strings.

Drill pipes are classified by grades, API (American Petroleum Institute) and premium. The drill location and hole depth determine the grade type that will be used. API grade drill pipes, which reached \$REDACTED billion to lead the market in 2016, are estimated to total nearly \$REDACTED billion by 2022 with a compound annual growth rate (CAGR) of about REDACTED%. New hydrocarbon sources (oil, gas and other) is driving the market for API and premium grade drill pipes.

The rise in the global demand for energy has increased conventional oil and gas explorations in deep and ultra-deepwater locations, spurring investments in unconventional resources such as shale, advancement in the drilling technologies and others. However, more government regulations, growing environmental concerns and the cost of high investments will restrain market growth.

Oil prices fell dramatically in 2014 due to the shale gas boom in the United States. To protect its market share and increased the cost of shale production, OPEC (Organization of the Petroleum Exporting Countries) increased their hydrocarbon

production. The global oil and gas markets were in the phase of transition in the last three years (2015 to 2017), where oilfield services were increasingly employed by all major players in the market for enhanced returns.

The onshore (land) deployment of drill pipes totaled nearly \$REDACTED billion in 2016 and is estimated to reach \$REDACTED billion in 2022 with a CAGR of REDACTED%. The rise in the requirements for the hydrocarbons across various industries around the world is driving the companies to invest in the offshore locations such as deep-water and ultra deepwater locations.

Geographically, North America led the global drill pipes market with a value of \$REDACTED million in 2016 and is estimated to reach \$REDACTED million by 2022 with a CAGR of about REDACTED%. North America owns the largest market share and fastest growth rate due to the rise in the shale resources. North America is followed by Middle East and Africa, Asia-Pacific, Europe and South America in descending order. r in terms of market share

Contents

CHAPTER 1 INTRODUCTION

Study Goals and Objectives
Reasons for Doing This Study
Scope of Report
Intended Audience
Methodology and Information Sources
Geographic Breakdown
Analyst's Credentials
Related Reports

CHAPTER 2 SUMMARY AND HIGHLIGHTS

CHAPTER 3 MARKET INTRODUCTION

Drivers
Increasing Need for Production Optimization
Increasing Exploration and Production Activities
Restraints
Environmental Concerns and Regulatory Issues
Economic Slowdown in Various Nations
Market Opportunity
Huge Shale Reserves Across Regions
Rise in Deepwater and Ultra-Deepwater Exploration
Value Chain

CHAPTER 4 MARKET BREAKDOWN BY GRADE

Introduction
API Grade
Market Outlook
Market Size and Forecast
Premium Grade
Market Outlook
Market Size and Forecast

CHAPTER 5 MARKET BREAKDOWN BY END-USE DEPLOYMENT

Introduction
Onshore
Market Outlook
Market Size and Forecast
Offshore
Market Outlook
Market Size and Forecast

CHAPTER 6 MARKET BREAKDOWN BY REGION

Introduction
North America
Market Outlook
Market Size and Forecast
United States
Canada
Mexico
Europe
Market Outlook
Market Size and Forecast
United Kingdom
Norway
Russia
Rest of Europe
Asia-Pacific
Market Outlook
Market Size and Forecast
China
India
Indonesia
Rest of Asia-Pacific
South America
Market Outlook
Market Size and Forecast
Brazil
Venezuela
Argentina
Rest of South America

Middle East and Africa
Market Outlook
Market Size and Forecast
Saudi Arabia
Unite Arab Emirates
Nigeria
Rest of Middle East and Africa

CHAPTER 7 COMPETITIVE LANDSCAPE

Introduction
Porters Five Forces
Threat of New Entrants
Bargaining Power of Supplier
Threat of Substitutes
Degree of Competition
Bargaining Power of Buyers
Developments and Strategies
Ranking of Top Companies
Future of the Market
Developing Unconventional Reserves
Deep and Ultradeep Reserves Development

CHAPTER 8 COMPANY PROFILES

DRILL PIPE INTERNATIONAL, LLC.
Business Overview
Products and Services
DP-MASTER MANUFACTURING (S) PTE LTD
Business Overview
Products and Services
HILONG GROUP
Business Overview
Products and Services
Financials
Developments and Strategies
JIANGYIN LONG BRIGHT DRILL PIPE MANUFACTURE CO. LTD.
