Report Scope:

The scope of this report is broad. It covers components, applications, end users and modes of deployment in 3D medical and surgical platforms. The market has been segmented by components into hardware, software and services. Revenue forecasts for 2018–2023 are given for each segment and regional market with estimated value derived from the revenue of manufacturers' total revenues. The main geographic markets—North America, Europe, Asia Pacific and Rest of World (ROW) are included.

The report also includes a discussion of the major players across each region in the 3D medical and surgical imaging platforms market. Further, it explains the major drivers and regional dynamics of the global 3D medical and surgical imaging platforms market and current trends within the industry.

Key industry acquisitions and strategic alliances are given for the three-year period 2015–2018 (June).

This report also examines the main patent trends within the industry and profiles 25 market players that deal in 3D medical and surgical imaging platforms.

The report concludes with a special focus on the vendor landscape and includes detailed profiles of the main vendors in the global 3D medical and surgical imaging platforms market.

Report Includes:

151 data tables and 66 additional tables

An overview of the global 3D medical and surgical imaging platform market

Analyses of global market trends with data from 2017, 2018, and projections of compound annual growth rates (CAGRs) through 2023

Characterization and quantification of the market potential for 3D medical and surgical imaging platform by geographical regions, components, applications, end users and mode of deployment

Discussion of major drivers, technological advancements and regional dynamics of the global 3D medical and surgical imaging platform market, and current trends within the industry

Assessment of the vendor landscape and detailed profiles of the major vendors in the global 3D medical and surgical imaging platform market

Company profiles of major players in the market, including Ambra Health, Esaote Spa, GE Healthcare, Koninklijke Philips NV, Medtronic Inc., Siemens Healthcare, Stryker Corp. and Whiteclouds

Industry Growth Drivers

Development of Modern Visualization Methods and Technology Platforms

High Adoption of Minimally Invasive Procedures

Adoption of Hybrid Operating Rooms as Part of an Efficient Medical Infrastructure

Increasing Use of Automation Technologies in the Healthcare Sector

Rising Demand for 3D Imaging in Diagnosing and Monitoring of Chronic Diseases

New Innovative Solutions by Platform Providers in the Market

Increasing Aging Population

Increased Prevalence of Chronic Diseases

Rising Healthcare Expenditures

CHAPTER 4 MARKET BREAKDOWN BY COMPONENT

CHAPTER 5 MARKET BREAKDOWN BY APPLICATION

Ultrasound

3D ULTRASOUND SCANNING TECHNIQUES

Increasing Incidence of Infectious and Chronic Diseases Drives the Ultrasound Market

Research and Development in CVD

Digital Radiography

Advantages of X-Ray Machines

Magnetic Resonance Imaging

Advancements in 3D Imaging

Computed Tomography

3D SURGICAL AND MEDICAL IMAGING PLATFORMS FOR CT SCAN

Common Applications of CT Scans
Application of CT in Pediatric Patients
Benefits
Advancements in Imaging Systems
Nuclear Imaging
Market Drivers
Positron Emission Computed Tomography (PET) Imaging
Single Photon Emission Computed Tomography (SPECT) Imaging
Scintigraphy Imaging
Estimation of Disability-Adjusted Life Years (DALYs) for Neurological Diseases
Technological Advancements in Nuclear Imaging:
