Report Scope

The market has been segmented based on organization size, deployment, end-user industry and geography. The report provides an overview of the global AIOps market, analyzes market trends and provides a qualitative analysis of application landscape.

With 2020 as the base year, the report provides estimated market data for the forecast period of 2021 through 2026. Revenue forecasts for this period are segmented based on organization size, deployment, end-user industry and geography. Market values have been estimated based on the total segmental revenue of the AI solutions, including platform and services, aimed at addressing IT operations.

The report covers the market for AIOps with regards to applications in various end-user industries across different regions. It also focuses on the major trends and challenges that affect the market and the vendor landscape. Application of AI and ML in areas such as experience management operations and delivery automation are not considered as part of the scope of the study.

Report Includes

35 data tables and 33 additional tables

An overview of the global market for AIOps or artificial intelligence for IT operations

Analyses of the global market trends, with data from 2020, estimates for 2021-2022, and projections of compound annual growth rates (CAGRs) through 2026

Estimation of the current market size and revenue forecast for the global AIOps market, and corresponding market share analysis by organization size, deployment type, end-user industry and geographical region

Highlights of the emerging technology trends, upcoming market opportunities and areas of focus to forecast the market and its various segments estimating current and future demand for AIOps

Insight into the product offering and future of AIOps — the nucleus of digital operations — and their applications in monitoring and managing the modern IT environments

Assessment of COVID-19 impact on the market for AIOps within the advanced analytics industry

Identification of the companies that are best positioned to meet this demand because of their proprietary technologies, strategic alliances, or other advantages

Discussion of the key strategies adopted by players such as collaborations and partnerships, product innovations, and acquisitions, expansions and investments

Evaluation of the company competitive landscape of major market participants based on their recent developments and total segmental revenues of the AI solutions

Descriptive company profiles of the leading industry players, including BigPanda Inc., BMC Software Inc., Broadcom Inc., Cisco Systems Inc., Logz.io, Moogsoft Inc., and Splunk Inc.
