Report Scope:

The scope of this report is broad, covering various technologies available in the market for polymers in electric vehicles and potential applications across various sectors. The market for polymers in electric vehicles is broken down by product segment. Revenue and Volumes forecasts from 2021 to 2026 are given for each product and application segment, with estimated values derived from the total revenues of manufacturers and through a study of the global market.

This report also includes a discussion of the main players across each regional market for polymers in electric vehicles. Further, it explains the main drivers and regional dynamics of the market and current trends within the industry.

This report concludes with a special focus on the vendor landscape that includes detailed profiles of the main vendors in the market.

Report Includes:

151 data tables and 69 additional tables

An up-to-date review and analysis of the global market for polymers used in electric vehicles (EVs)

Analyses of the global market trends, with data from 2020 and 2021, and projections of compound annual growth rates (CAGRs) through 2026

Evaluation and forecast the overall market size for polymer based EVs in value and volumetric terms, and their corresponding market share analysis by product

segment, application, and region

Highlights of the market potential for polymers used in electric vehicles, and areas of focus to forecast this market into various segments and sub-segments

In-depth information (facts and figures) concerning market drivers, opportunities, challenges and other demographic and economic factors that will drive future demand for this market

Review of the current market status, key technology issues, industry value chain, Porter's five forces analysis, competitive scenario, R&D activities, and COVID-19 implications on the progress of this market

Description of polymer properties and discussion on their ability to control carbon footprints

Insight into the key merger and acquisition deals, joint ventures and innovation strategies by leading players in the global electric vehicles and polymers industry

Descriptive company profiles of the major global players, including Arkema, Asahi Kasei Corp., BASF SE, Covestro AG, DSM, Evonik Industries, LG Chem, LyondellBasell Industries, and Solvay S.A.
