Abstracts

Report Scope:

The scope of the report covers the overview of the global market for adipic acid and analyses of global market trends, with data from 2016, a base year of 2017 and estimates for 2018 and 2023, with projections of CAGR in the forecast duration. Sales values are presented in U.S. dollars, while volumes are presented in kilotons units. Estimated values used are based on manufacturers' total revenues. Projected and forecasted revenue values are in constant U.S. dollars, unadjusted for inflation.

The report discusses technological and economic trends affecting the market. Further, it explains the major drivers and regional dynamics of the adipic acid market and current trends within the industry.

This report categorizes the global adipic acid market based on type, intermediate application, end-use application and region. Based on type, the adipic acid market is divided into synthetic and bio-based. Based on intermediate applications, the adipic acid market is divided into polyamide 6/6; polyurethanes; adipate esters and others (includes food additive, lubricants, fillers, paper additives, polyester molding agents and other chemical intermediates). Based on end-use application, the market is divided into automotive; electrical and electronics; shoe soles; sporting goods; synthetic leather; packaging films and coatings; food and beverage/pharmaceuticals; and others (includes bristles, surgical sutures, strings for acoustic and classical musical instruments, ropes, ribbons, women's stockings and furniture). On the basis of region, the market is divided into North America, Asia-Pacific, Europe, South America, and the Middle East and Africa.

The report concludes with a special focus on the vendor landscape and includes profiles of major market players operating in the global adipic acid market.

Report Includes:

78 data tables and 25 additional tables

Country specific data and analysis for U.S., Canada, Mexico, Germany, Italy, France, China, India, Japan, Brazil, Argentina, Saudi Arabia and UAE

Complete understanding of Polyamide 66 and its application in the automotive industry

Detailed description of synthetic and bio-based adipic acids and their manufacturing process

Insights of government regulations affecting adipic acid industry

Profiles of major companies in the industry, including Arkema, Evonik, Lanxess, Sumitomo Chemical Co. Ltd., Koninklijke DSM N.V., Mitsui Chemicals Inc and The Dow Chemical Co.
