REPORT SCOPE:

This research report presents an in-depth analysis of the global agrochemical market by product type and regional geographic markets. It covers the major categories of agrochemicals used for crop protection across the globe. The evolving trends and ongoing research and developments in the field of agrochemical developments have been studied in detail. The report analyses the active ingredients used in the market and not the formulations.

This study highlights the emergence of genetically modified crops, the importance of crop protection, and the pros and cons of pesticide use. Special importance has been given to key market developments such as collaborative activities, important acquisitions, new product launches, and strategic agreements between top players. An analysis of the key drivers and factors either affecting or influencing the growth of this market is also included in this report. The analysis also includes the current and projected markets for agrochemicals across geographic regions while considering different parameters (e.g., government regulations, climatic conditions, and crop production).

The global agrochemical market is mainly segmented into types and regions. Types of agrochemicals are principally categorized into pesticides and fertilizers. Pesticides primarily include herbicides, insecticides, and fungicides. Nitrogenous, phosphatic, potassic, and biofertilizers are covered under the fertilizer category. In terms of geography, the market is categorized by North America, Europe, Asia-Pacific, and the rest of the world. ROW primarily consists of economies such as Brazil, Argentina, Egypt, South Africa, Chile, Colombia, Turkey, Iraq, Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates

REPORT INCLUDES:

103 data tables and 26 additional tables

Detailed overview and industry analysis of the global agrochemicals market

Analyses of global market trends with data from 2018, estimates for 2019, and projections of compound annual growth rates (CAGRs) through 2024

The latest information on the leading companies engaged in research and development (R&D) and products in pipeline with SWOT analyses

Discussion of major factors, advancements in agriculture technologies, regional trade analysis, and changing regulatory dynamics that influence the demand of this evolving market

Tracking and analyses of partnerships, alliances, joint ventures, and mergers and acquisition details between major stakeholders

Identification of segments with high growth potential and understand future applications in these segments

A relevant patent analysis

Company profiles of leading market participants within the industry, including American Vanguard Corporation, BASF SE, Bayer AG, Nufarm Ltd., Potash Corp., Sumitomo Chemical Co., and Yara International ASA
