Abstracts

REPORT SCOPE:

The current report provides detailed exposure to blockchain technology in healthcare industry. This report also highlights current and future market potential of blockchain technology along with a detailed analysis of the competitive environment, technological advancement and market dynamics such as market drivers and factors restraining the market growth. The report also covers market projections to 2023, and company profiles. The report details the applications involved in the blockchain technology such as pharmaceutical supply chain, electronic medical records (EMRs), biomedical research and education, and health data analytics. By geography, the market has been segregated as North America, Europe, Asia-Pacific, Middle East and Africa, and South America region. The North America region includes countries USA, Canada and Mexico, Europe includes countries Germany, UK, France, and Rest of Europe, Asia-Pacific including countries China, India, Japan, Rest of Asia-Pacific. For market estimates, data has been provided for the year 2018, as base year, 2019 and forecast for 2023.

REPORT INCLUDES:

Descriptive study and market analysis of blockchain technology in healthcare systems within the industry

Entailing details of applications involved in the blockchain technology such as pharmaceutical supply chain, electronic medical records (EMRs), biomedical research and education, and health data analytics

Competitive environment of the leading stakeholders offering blockchain infrastructure, applications, and/or services; their key strategies and market
