

Implosion Manufacturing: Novel Nanotech Methods for Next Generation Materials

<https://marketpublishers.com/r/I802833FD58AEN.html>

Date: November 2019

Pages: 118

Price: US\$ 2,750.00 (Single User License)

ID: I802833FD58AEN

Abstracts

REPORT SCOPE:

The report will evaluate the various technologies that are being developed or adapted from existing nanofabrication technologies, including -

New technologies.

Implosion fabrication.

Surfactant?assisted multiphoton?induced reduction.

Spun-wrapped aligned nanofiber (SWAN) lithography.

Ion beam etching redeposition.

Laser scanning holographic lithography.

Proton beam nano-machining.

Others, as appropriate.

Modifications of existing technologies.

Nanoimprint lithography.

Others, as appropriate.

The time frame for the analysis is the period from 2018 to 2029 to allow for the fact that many of the devices analyzed by the report are still in the research and development phase, but could reach the commercial market by 2029. The market values estimated or imputed for various segments represent the direct cost to the user or investor. These values are expressed in 2018 dollars, and no attempt has been made to adjust them for inflation.

REPORT INCLUDES:

46 data tables and 15 additional tables

An overview of implosion manufacturing, a 3D enabled nanolithography technology for next generation materials

Analyses of the global market trends with data from 2018, estimates for 2019, and projections of compound annual growth rates (CAGRs) for a 10-year timeframe through 2029

Description of key enabling technologies such as hydrogels and two-photon microscopy; and their applications with the greatest commercial potential

Information on the industry's structure, market size and market dynamics that will impact the future growth

A relevant patent analysis and number of U.S. patents issued for implosion fabrication-related developments

Company profiles of the leading market participants within the nanotech industry, including Nano3D Biosciences, Nanonex, NanoOpto Corp., NIL Technology ApS and SwissLitho AG

Related BCC Research Reports

CHAPTER 2 SUMMARY AND HIGHLIGHTS

CHAPTER 3 MARKET AND TECHNOLOGY BACKGROUND

Definitions
Nanofabrication
3D Nanostructures
History
Technologies
Implosion Fabrication
Two-Photon Polymerization
Surfactant-Assisted Multiphoton-Induced Reduction
Spun-Wrapped Aligned Nanofiber (SWAN) Lithography
Ion Beam Etching Redeposition
Proton Beam Nano-Machining
Nanoimprint Lithography
Additive Manufacturing
Laser-Based Particle Deposition
Self-Assembly
Positional Nanoassembly
Nano-Kirigami
Materials
Carbon Allotropes
Biohybrid Materials
Hydrogels

Ceramics
Metals
Polymers
Silicon
Potential Applications
Nanolenses
Nanoelectronics
Nanorobots
Metamaterials
Nanophotonics and Plasmonics
Nanosensors
Labs-on-a-Chip and Labs-on-Fiber
Nano-Energy Harvesting and Storage
Nano-Medical Implants
End-Users
Research
Healthcare
Electrical/Electronic Equipment
Communications
Process Industry
Energy/Environmental Protection
Military/Public Safety
Market Summary

CHAPTER 4 MARKET BREAKDOWN BY TECHNOLOGY TYPE

Implosion Fabrication
Technology
Applications and End-Users
Projected Market, 2018-2029
Two-Photon Polymerization
Technology
Applications and End-Users
Projected Available Market, 2018-2029
Surfactant-Assisted Multiphoton-Induced Reduction
Technology
Applications and End-Users
Projected Market, 2018-2029
Spun-Wrapped Aligned Nanofiber Lithography

Technology
Applications and End-Users
Projected Available Market, 2018-2029
Ion Beam Etching Redeposition
Technology
Applications and End-Users
Projected Available Market, 2018-2029
Proton Beam Nanomachining
Technology
Applications
Projected Available Market, 2018-2029
Nanoimprint Lithography
Technology
Applications and End-Users
Projected Available Market, 2018-2029
Additive Manufacturing
Technology
Applications and End-Users
Projected Available Market, 2018-2029
Self-Assembly
Technology
Applications and End-Users
Projected Available Market, 2018-2029
Nano-Kirigami
Technology
Applications
Available Market, 2018 - 2029
Positional Nanoassembly
Technology
Applications and End-Users
Projected Available Market, 2018-2029

CHAPTER 5 MARKET BREAKDOWN BY APPLICATION

Summary
Optics and Photonics
Microelectronics and Information Technology
Biochips and Nanosensors
Medical Devices

Light Emitting Diodes
Miscellaneous Application

CHAPTER 6 MARKET BREAKDOWN BY END-USER SECTOR

CHAPTER 7 MARKET BREAKDOWN BY REGION AND COUNTRY

CHAPTER 8 ANALYSIS OF MARKET OPPORTUNITIES

Technologies
Nanoimprint Lithography
Other Technologies
Applications and End-Users
Light-Emitting Diodes
Biochips and Nanosensors
Memory Devices
Photonic Crystals
Tissue Scaffolds
Geographical Markets

CHAPTER 9 COMPANY PROFILES

AMO GMBH
EV GROUP
IMS CHIPS
NANO3D BIOSCIENCES
NANONEX
NANOOPTO CORP.
NANOSCALE SYSTEMS GMBH
NANOSCRIBE GMBH
NIL TECHNOLOGY APS
OBDUCAT AB
SUSSMICROTEC SE
SWISSLITHO AG
XJET
