Report Scope

This report provides information on the medical MRI market regarding science, revenues, technology innovations, key manufacturers and the competitive landscape. Market estimates are provided by considering new sales of MRI machines for human use only. A different report will discuss the market estimates for used and refurbished MRI devices.

The market was segmented based on architecture, field strength, application, end user and region. The architecture segment is divided into open, closed and extremity devices. The field strength segment is divided into four segments: low-medium field, high-field, very high field and ultra-high field MRI systems. The application areas segment is divided into spine MRI, brain MRI, vascular and cardiac MRI, extremities and musculoskeletal MRI, head and neck MRI, abdominal and pelvis MRI, whole-body MRI and others. The end-user segments are hospitals, diagnostic imaging laboratories and others. The regional segments are North America (i.e., the U.S. and Canada); Europe (i.e., Germany, the U.K., France, Italy, Spain, and the rest of Europe); Asia-Pacific (i.e., China, India, Japan, Australia, South Korea, and the rest of Asia-Pacific) and Rest of the World (RoW) (i.e., the Middle East and Africa, and South America).

This report analyzes the market trends associated with MRI devices using data from 2022 as the base year and projections of compound annual growth rates through 2028 (i.e., the forecast period 2023 through 2028).
